MARINE NATURAL HISTORY CRUISES

An exciting new series of monthly marine natural history cruises will provide an unprecedented opportunity to explore the rich diversity of life in New England waters at all seasons. Seabirds, seals, and perhaps even whales will lure us offshore in the winter months. Island exploration, summer whale/bird cruises, and even a trip to Maine are being planned. All trips will be escorted by knowledgeable observers. We will cruise on the 77-foot, well-heated *M/V Voyager*, owned by the New England Aquarium. For more information please contact: Massachusetts Audubon Society, Natural History Tours/Pelagic Trips, Lincoln, MA 01773. Telephone: 617-259-9500 x7410.
