

HOT BIRDS

A **Chestnut-collared Longspur** (left) was a very nice find for Bill Gette and David Weaver (Joppa Flats Wednesday Morning Birding) on the Parker River National Wildlife Refuge on December 15, 2004. David took this photograph of a very rare visitor to the state.

This female **Varied Thrush** (right) was photographed by Tom Murray in Concord on December 30, 2004.

Steve Mirick took this photograph of a **White-winged Dove** (left) on December 31, 2004, on Nantucket.

Frank Gallo and Patrick Dugan found this **California Gull** (right) on January 3, 2005, on Nantucket. Jeremiah Trimble took this great photograph on January 8. Seems like Nantucket had a pretty HOT winter.
