

Howard Mahnken, of Lambertville, N. J. reports that he banded the following species from April 30, 1949 to April 30, 1950:

48 Juncos	16 Chickadees
4 W.T. Sparrows	11 Titmice
6 Song Sparrows	4 Downy Woodpeckers
6 Goldfinches	9 W. B. Nuthatches
3 Purple Finches	2 Cowbirds
27 Starlings	2 C. Swifts
24 P. Grackles	2 Screech Owls
2 Robins	1 Saw Whet Owl
19 Evening Grosbeaks	
	<u>186</u> - Total

He also writes: "I use chick feed, bread, sunflower, canary and millet seeds for bait. For some birds I use suet. I only operate 4 traps. Thanks to my pupils, I have been able to band a few unusual birds. The three owls were all brought to school by pupils last year. Not included on the list above is another screech owl brought to me last month by a pupil. They also bring in bands of birds found dead."

JUNCO SYMPOSIUM

Please do not forget the Junco Symposium for the February issue. Reference to the previous symposium on White-throats will help you decide which of your information is of value.

NEW MEMBERS

Mrs. Beecher S. Bowdish, Demarest, N. J.
