

A Harris Sparrow was trapped, banded and released A Harris Sparrow was trapped, New Hope by Mrs. Henry Hartman, Star Route, New Hope by Mrs. Henry Hartman, Star Route, New Hope Page 1988 by Mrs. Henry Hartman, Stat & Banders who A first for Pennsylvania? & & Banders who Catch A first for Pennsylvania.

bats in their nets are advised by Harold B. Hitch cock, of Middlebury, Vt., to wear gloves while extracting them; if not gloves, he says, use few thicknesses of handkerchief. And he states that a bat held by the back of the neck cannot reach the hand with its teeth to the Still available by Author. Species & Subjective of the Still available of the

are some copies of the Index of EBBA NEWS, by Author, Species & Subject Volumes 13-21 (1950-58) inclusive, which was prepared by Mary Schmid you want one, please write us, enclosing a dollar # ## Note the new months of this publication you want one, prease write us, chorden issues of this publication. They Do It" section - reprints from back issues of this publication. Any one wishing a special reprint, should write and tell us about it EBBA Member Bert Murray is presenting a paper to the Wilson O.S. this month which questions the so-called Allen-Peterson theory of hawk migration. This should result in the stirring up of the thinking of many ormithologists at and Albert Schnitzer is going to bring us a report of the Wilson O.S. meeting in the next issue of EBBA NEWS that If anyone knows details of Cedar Waxwings with red plastic bands on the bend of the left wing, please inform us. Dr. F. W. Preston, of Butler, Pa., observed such a flock # # Be sure to send us drawings or photographs which illustrate something pertaining to banders or banding. This issue's Contest was won by J. Douglas Whitman, of Jordan, N.Y. (he won once last year, also) for his photographs of our East Stroudsburg meeting. His prize, two nets, are being sent to him. (EBBA's Editors and officers are not eligible for this contest, of course.) # # # All decorations in this issue, are by our Art Editor, Dorothy Bordner, of State College, Pa., as usual. Aren't we lucky? # # Plan now to attend next year's Annual Meeting # # #

MIST NETS (Ebba does not wish to make a profit on nets ... Ebba NOW AVAILABLE wants Sustaining Members ... if you use 6 nets or more a year, it pays to become a Sustaining Member. ) Regular nets are Four Shelves -- 120 meshes deep. Warbler Nets are Four Shelves, 140 Meshes Deep,  $1\frac{1}{4}$ " mesh (these nets are designed especially for warders they are much finer denier and smaller mesh and 20 meshes deeper than our regular nets.) The prices:

				Active Member	Sustaining Mbr.
