HONOR ROLL - WHO BANDED WHAT - 1963

Here are the results of the 60 EBBA members who sent in their reports this year. An additional 12 members sent in their totals but these are not included as the birds they banded were not banded in the eastern states. Total number of birds banded in EBBA territory as reported was 165,634 of 249 species.

WHITE-CROWNED SPARROW INFORMATION WANTED

By R. Connor Tedards

This item gives you information which I think may be somewhat unusual pertaining to the White-crowned Sparrow (Zonotrichia leucophrys).

From January 15, 1964 through February 29 I banded 7 sub-adults (this classification after 1-1-64.) This species was casual to my observations until approximately the winter of 1962. Since 1962 the species seems to be increasing in numbers during the winter and spring migration. It is also interesting from my point of view that all my bandings were sub-adults.

I would appreciate any advice as to other available information concerning the White-crowned Sparrow.

Route 2, Brown Road, Anderson, South Carolina.
