INFORMATION ON RARE BOOKS WANTED

"American Ornithology, or the Natural History of Birds of United States," by Alexander Wilson was published in nine volumes from 1808 through 1814. These are now rare old books. Probably few complete sets are now in existence and only a scattering of broken sets, single volumes or plates which have been removed from these books. The numerous plates were all hand colored, many of them being done by Alexander Wilson himself.

Mrs. John Lueshen, Wisner, Nebraska is making an attempt to learn the whereabouts of the remaining books. Some of these are in public libraries, others are privately owned. Anyone knowing where there are complete sets, single volumes, or plates from "American Ornithology" by Alexander Wilson is requested to write to Mrs. John Lueshen, Wisner, Nebraska 68791.
