## 1966 E. B. B. A. ANNUAL MEETING

The Editor's arrangements for complete coverage of the 1966 annual fell through due to a series of misunderstandings, we regret to say.

But we have heard from many of those who atte ded (we were far away best man at our son Malcolm's wedding) that it was one of the meetings ever — and more members and guests attended than at best meeting except for the one at Cape May, N.J. in 1962.

outstanding, according to many, were the advances in communication and cooperation with the Bird Banding Laboratory whose chief, Earl Bay-inger outlined the several changes in policy, procedures and philosophies pertaining to the banding program.

In his introduction of Earl Baysinger, EBBA President John Given said:

orthe Bird Banding Laboratory under the direction of Earl Baysinger has done a tremendous job this last year in clarifying policy and improving efficiencies. We want Mr. Baysinger to know that the officers and council members of EBBA are in accord with his aims and philosophies.

We accept the Bird Banding Laboratory's invitation for more active communication with our association and our Education Committee will pass on to you our comments, suggestions and criticisms.

"We greatly appreciate your encouragement in the March issue of Banding Notes" for all banders to join banding associations. We hope this will continue in the future.

"We are also looking forward to the revised banding manual which you have indicated is presently being assembled."
