

EDITORIAL

Acknowledgments.—I am grateful to Fred Lohrer and Jim Rodgers for their helpful advice, encouragement, and assistance in a smooth transition of the editorship. Over the past year, many individuals contributed to Volume 19 of the *Florida Field Naturalist*. Of special note was the effort of Tom Webber in doing the final preparation and revision of L. L. Alexander's paper. Also of note was the effort of Jim Kushlan in masterfully blending the thoughts and remembrances of many of Bud Owre's former graduate students. Lydia Owre kindly provided the photograph featured in this tribute. Victoria Merritt assisted in proofreading the entire volume. Applying her experience as a professional technical writer, she is responsible for finding many errors that had been overlooked. Finally, I thank the individuals listed below for serving as referees during the past year. Their efforts have improved the quality of the papers appearing in this and the upcoming volume of the journal. Those with an asterisk next to their name reviewed more than one article.
