

Inland Regional News

Inland Bird Banding Association

Founded 1922

Annual Report of Birds Banded in the IBBA region, 2014.

IBBA is providing banding totals for the region on an annual basis. This is intended to stimulate regional coordination of banding operations and to provide rudimentary information for researchers considering studies on species and where a target species may be located in the region. This report has been compiled by requesting data directly from the Bird Banding Laboratory (USGS Bird Banding Laboratory, unpublished data retrieved October 2015). Future reports will be compiled following BBL file updates that occur annually in August of the following calendar year.

Highlights for 2014 include a total of 391,910 (+7% from 2013) individuals of 385 (-1% from 2013) species (406 total species, sub-species, forms, hybrids). Texas recorded the most species (216) followed by Ohio (200) and Illinois (189). Banders in Ohio banded the largest number of individuals (45,584) followed by Illinois (39,443) and Texas (33,414). The lowest state banding total was Mississippi with 2,370. There were 392 (-2% from 2013) active permits in the IBBA region in 2014. Wisconsin had 52 permits, Texas 48, and Minnesota 43 to lead the state/provincial jurisdictions. As might be expected the ten highest volume permits included seven governmental agencies that have regulatory responsibility for hunted species of migratory birds. The largest volume of birds banded on a single permit reported 25,757 birds for 2014 (Table 1). The top ten species banded were heavy towards hunted species. Once again, the top non-hunted species was the Ruby-throated Hummingbird, indicating a major effort

across the region on this bird group. Top ten species were: Canada Goose 47,484 (1 in 2013); Mallard 31,400 (6 in 2013); Mourning Dove 30,455 (2 in 2013); Wood Duck 23,567 (3 in 2013); Ruby-throated Hummingbird 16,516 (4 in 2013); Blue-winged Teal 16,401 (5 in 2013); American Goldfinch 14,406 (7 in 2012); Tree Swallow 6,875; White-winged Dove 6,534; and Gray Catbird 5,856 (8 in 2013). Twenty-one species were represented by one individual in 2014.

A complete listing of numbers banded by species and state is included in Table 2.

Call for proposals for the Inland Bird Banding Association (IBBA) Grant Programs

The INLAND BIRD BANDING ASSOCIATION (IBBA) maintains two funds for providing grants to individuals conducting research that involves banding or marking birds. IBBA is accepting proposals until 31 Dec 2015 for the year of 2016. For more information, please visit our website at <http://www.ibbainfo.org>. All applications for grants shall be directed to the Second Vice President: Linda C. Tossing at ltossing@aol.com

The AVIAN RESEARCH FUND is for the purposes of providing limited grants to IBBA members conducting research that involves the banding or marking of native wild birds. Grants: A total of \$500 in grant money may be authorized annually for Project Proposals that are approved by the IBBA Grant Committee. Notification of grant decisions by the IBBA Grant Committee will be recommended for IBBA board approval within 31 days of the submission deadline of 31 Dec 2015.

The PAUL STEWART IBBA AVIAN RESEARCH FUND is for the purposes of providing limited grants to individuals conducting research that involves the banding or marking of Neotropical migratory birds. Grants: A total of \$1000 in grant money may be authorized annually for Project Proposals that are approved by the IBBA Grant Committee. Notification of grant decisions by the IBBA Grant Committee will be recommended for IBBA board approval within 31 days of the submission deadline of 31 Dec 2015.

If have you have questions, please direct your questions to **Linda C. Tossing at ltossing@aol.com**
