ADDENDUM: In Vol. 10, No. 2, Mississippi Kite 6/3 Shelby Co. should be added to the species reports. To clarify the status of Snowy Egret, Little Blue Heron, and Cattle Egret, the records at ONWR are individual birds, not nests. Records attributed to ECP at ONWR are group counts compiled on the monthly refuge hike (in this and past issues).

Ohio's first Northern Wheatear (*Oenanthe oenanthe*) was discovered in Ottawa County on January 4, 1988, and remained until at least January 21. Details will be published in the next issue of THE OHIO CARDINAL.
