PERMANENT RESIDENTS

The following species are widespread permanent residents (for the most part) in Ohio and elicited few, if any, comments from reporters concerning change in status.

Ring-necked Pheasant	Belted Kingfisher	White-breasted Nuthatch
Northern Bobwhite	Red-bellied Woodpecker	Carolina Wren
Ring-billed Gull	Downy Woodpecker	Eastern Bluebird
Herring Gull	Hairy Woodpecker	Northern Mockingbird
Rock Dove	Pileated Woodpecker	European Starling
Mourning Dove	Black-capped Chickadee	House Finch
Eastern Screech-Owl	Carolina Chickadee	American Goldfinch
Great Horned Owl	Tufted Titmouse	House Sparrow

UNDOCUMENTED REPORTS

Northern Goshawk 4/16 Franklin Co.  
Long-billed Dowitcher 5/7 ONWR (2)

ADDENDUM/CORRIGENDUM

In Vol. 11 (2), two corrections should be made in the Christmas Count summary. Three Red-breasted nuthatches, not 35, were noted on the Dayton count, and the King eider should be listed on the Lake Erie Islands count. In Vol. 10 (1):4, the Brambling record for N.D. should read 12/15/79 - 4/4/80. This makes this a spring record as well as winter.

\*\*\*\*\*

Ohio's second record of Black-throated Sparrow occurred in June when this species was discovered in Geauga County. Details will be published in the next issue of THE OHIO CARDINAL.
