

THE CHRISTMAS BIRD COUNTS REPORT

By Ned Keller

The results from 68 counts are included in this year's report. All but two of the counts were official National Audubon Society Christmas Counts. Carey does not report its results to National Audubon, but runs its count according to the same protocol. Sunday and Monday Creeks should be an official count next year. National Audubon requires new counts to conduct a "trial run" before becoming official, and the results of that "trial run" are included here.

We were spoiled by last year's high number of 171 species. This year we were back to a more normal 151 species reported in all the circles. Because of the way National Audubon now reports its data, it is rather difficult to extract "count week" birds — species which were seen during the week of a count, but not on the actual day of the count. A little detective work indicates that at least four additional species fall into that category — Greater White-fronted Goose at Hoover, Common Raven at Mohican, Vesper Sparrow at Ashland, and Yellow-headed Blackbird at Quail Hollow/Ragersville. There may be more.

Eleven species were found on only a single count this year: Great Egret (Gypsum), Osprey (Ohio River), Broad-winged Hawk (Hocking Hills), American Woodcock (East Fork Lake S.P.), Blue-headed Vireo (Buckeye Lake), Tree Swallow (Toledo, ten individuals), Orange-crowned Warbler (Fremont), Common Yellowthroat (Ragersville), Summer Tanager (Youngstown), Le Conte's Sparrow (Cleveland), and Lincoln's Sparrow (Carey). At the other end of the spectrum, 14 species were found on all 68 counts: Canada Goose, Mallard, Red-tailed Hawk, Red-bellied Woodpecker, Downy Woodpecker, Northern Flicker, Blue Jay, American

Crow, White-breasted Nuthatch, Carolina Wren, Dark-eyed Junco, Northern Cardinal, American Goldfinch, and House Sparrow.

Toledo counters found the most species this year, 95, followed by Cincinnati with 93 and Ohio River with 92. The 123 counters at Cuyahoga Falls was by far the largest number of volunteers on any count. But it's not all about racking up big numbers. The two counters at Goll Woods, or the three at Ashland/Boyd County or at Beaver Valley, made just as much of a contribution to our knowledge of early winter bird distribution.

As always, the report includes everything that was reported to National Audubon (or directly to us), and no effort has been made to scrutinize questionable data. I do hope, however, that documentation of the Common Raven and the Eurasian Collared-Doves, which are state review birds, was sent to the Ohio Bird Records Committee. If not, it isn't too late to send it to the Secretary, Paul Gardner, at psg0708@gmail.com or 295 Acton Road, Columbus, OH 43214-3305.

We would like to thank the National Audubon Society for providing access to most of the data included in this report. Their web site, at <http://birds.audubon.org/christmas-bird-count>, has lots more information about the Christmas Bird Count. This past year was the 114th for this citizen science project, and we hope for many more.

Ned is the administrator of the OOS Ohio-birds listserve and the website Cincinnati Bird Sightings Log, <http://cincinnatibirds.com/goodbird/sighting.php>. In addition to that task, Ned contributes this CBC summary for each winter issue of the Ohio Cardinal. He recently retired after several years as the Secretary of the Ohio Bird Records Committee.

Note on the 114th Audubon Christmas Count tables

The tables on the following twenty pages are set up so that all the species are presented for the first half of the locations. Then the species list is repeated for the second half of the locations.

- First half of locations are on pages 80 – 89
- Second half of locations are on pages 90 – 99.
- Species are listed as received from Audubon, in an older taxonomic order.
