

INDEX TO VOLUME 35 - 1972

Prepared by Mary Schmid

Issues are separated by semicolons. The Figures represent Issue number, Page Number. In some cases symbols in italics are included as follows:

<i>A</i> Age of	<i>D</i> Disease	<i>Ph</i> Photograph	
<i>B</i> Bait	<i>Dr</i> Drawing	<i>Pl</i> Plumage	<i>S</i> Sexing
<i>Ba</i> Band	<i>Fr</i> Foreign Retrap	<i>Rc</i> Recovery	<i>St</i> Study
<i>Cm</i> Color Marked	<i>I</i> Identification	<i>Rt</i> Return	<i>Tr</i> Trap

To conserve space, individual references for each species mentioned in "EBBA ANNUAL BANDING SUMMARY" are not included.

BOOK REVIEW

Natural History of the Swainson's Warbler

By Brooke Meanley

U.S. Dept. of the Interior, Fish & Wildlife Svc., Bur. of Sport Fisheries & Wildlife; North American Fauna, No. 69. 1971.50¢
Order from: Superintendent of Documents, U.S. Gov't Printing Office, Washington, D. C. 20402.

Here is very interesting and informative material about the Swainson's Warbler, *Limnothlypis swainsonii*, one of the least known songbirds in the southern United States. It is the least abundant of our southern warblers except for the Bachman's Warbler, *Vermivora bachmanii*.

Its habitat, primarily in the deep swamps and canebrakes of the river floodplain forests of the South Atlantic and Gulf-coast as well as the dense areas of the Southern Appalachians, have discouraged research of this species.

This pamphlet has ten principal parts following the introduction and history: distribution, migration, ecological relations, description, breeding biology, voice, feeding behavior and food, factors affecting population, and an adequate summary.

The author presents a fine correlation between his field study and a wealth of previously published material.

Dr. Meanley has filled an important gap in the study of the wood warblers of North America.

--Katherine G. Price, 121 Cherry Street, Mount Holly, N.J. 08060
