distribution of the species is given in tabular form at the end of the paper, from which it appears that 19 are peculiar to Cozumel, while 24 are North American, and the remaining 21 tropical American.

As already noticed (Auk, Vol. II, p. 294), a paper on the birds of this island was published by Mr. Salvin in 'The Ibis' for April, 1885, in which several of the species previously given as new by Mr. Ridgway were renamed by Mr. Salvin. The method of Mr. Ridgway's publication of his preliminary paper (in pamphlet form, in advance of the 'Proceedings' of which it formed a part) having been criticised by Mr. Salvin, Mr. Ridgway takes occasion to defend the system of an advance distribution of authors' editions, so often, and, as we believe, properly, resorted to, particularly, but not exclusively. in this country, in cases where otherwise a considerable interval would elapse between the printing and the distribution, or 'publication,' of the papers in the regular issuing of the publications of which they form a part.—J.
