

filled with well-selected matter, and go far toward answering every important inquiry respecting the life-history of this notable species.—J. A. A.

Nash's 'Check-List of the Birds of Ontario.'¹—Mr. Nash's briefly annotated list of the birds of Ontario numbers 302 species, and is based on the author's personal knowledge, except where credit is given to other authority. It cannot fail to be a very useful and convenient summary of the ornithology of the Province, and is very neatly and correctly printed.—J. A. A.

Macoun's 'Catalogue of Canadian Birds.'²—The scope and character of Mr. Macoun's 'Catalogue of Canadian Birds' is thus succinctly stated in Dr. George M. Dawson's prefatory note, namely: "It is intended to enumerate all of the birds of the Dominion systematically and to bring together the principal known facts in regard to their distribution, migrations and breeding habits." In the author's preface he further states that the 'Catalogue' is to also include "Newfoundland, Greenland and Alaska," or the whole of North America north of the United States. "The nomenclature and the numbers given in the latest edition and supplements of the Check-list published by the American Ornithologists' Union have been made the basis of arrangement of the catalogue." It would have been advisable to have also added a separate and consecutive series of numbers for the species of the 'Catalogue.' Part I includes Nos. 1 to 316 of the A. O. U. Check-List, and takes in rather more than four fifths of all the species.

The first enumeration of the birds of this extensive region is that contained in the second volume of the 'Fauna Boreali-Americana' of Swainson and Richardson, published in 1831, which contained 267 species. In 1878 a second enumeration was made by Mr. Montague Chamberlain, restricted however to Canada, and thus excluding Alaska and Greenland, the number of species being 556.
