The Ornithological Journals.

Bird-Lore. Vol. XV. No. 2. March-April, 1913.

This number is devoted almost entirely to the Passenger Pigeon, with illustrations from photographs of live birds taken by J. G. Hubbard, in Dr. C. O. Whitman's aviary, in 1898.

A Vanished Race. By Moritz Fischer.

The Passenger Pigeon: Early Historical Records. By A. H. Wright.

Recollections of the Passenger Pigeon in Captivity. By Wallace Craig.

The Last Passenger Pigeon. By E. H. Forbush.

Migration of N. A. Sparrows. By W. W. Cooke—Fox Sparrow. Plumage notes by F. M. Chapman.

Two Educational Leaflets treat of The Emperor Goose, By E. W. Nelson, and The Crested Auklet, By C. H. Townsend.

Bird-Lore. Vol. XV. No. 3. May-June. 1913.

A Bird Apartment House. By Albert Morgan.—Sparrow Hawk, Bluebird and Flicker nesting in the same tree trunk.

A Purple Martin Colony. By W. M. Tyler.—At Salisbury, N. H. Barn Swallows in Springtime. By J. W. Lippincott.—A good study of habits.

The Gray Kingbird at Home. By Henry Thurston.—At Tampa Bay, Fla.

A Pet Blue Jay. By Mrs. H. E. Merrill.

The Migration of N. A. Sparrows. By W. W. Cooke with Notes on the Plumage by W. DeW. Miller.—Treats of Pyrrhuloxia and Cardinal.

The Green Heron, by T. Gilbert Pearson and The Alaska Longspur By E. W. Nelson, are the Educational Leaflets of this number.

The Condor.² Vol. XV. No. 2. March — April, 1913.

Largely a prospectus of Dawson's proposed 'Birds of California.'

The Nesting of the Prairie Falcon in San Luis Obispo County. By W. L. Dawson.

William Leon Dawson — A Biography. By H. S. Swarth.

Allan Brooks — An Appreciation. By W. L. Dawson.

Leucosticte tephrocotis dawsoni.— A New Race of the Rosy Finch from the Sierra Nevada. By Joseph Grinnell.

Great Destruction of Birds' Eggs and Nestlings in the Sierra Nevada. By A. M. Ingersoll.

Birds Observed in the Summer of 1912 among the Santa Barbara Islands. By Howard Wright and G. K. Snyder.

The Wilson Bulletin.³ Vol. XXV. No. 1. March, 1913.

¹ Organ of the Audubon Societies. Edited by F. M. Chapman. Published by D. Appleton & Co. Harrisburg, Pa.

¹ Edited for the Cooper Ornithological Club, by Joseph Grinnell. Published at The Condor Office, Hollywood, California.

³ Edited for the Wilson Ornithological Club, by Lynds Jones, Oberlin, Ohio.

Variations in Bird Migration from Year to Year. By W. W. Cooke—Prof. Cooke maintains "that the departure from the winter home has no connection with the weather, and that the average temperature at the breeding grounds is the principal factor that determines the time and speed of migration" and that "local variations in temperature should have only a slight influence in varying the dates of arrival from year to year." We think that in this he is probably correct but we cannot concede the degree of accuracy that he claims for various calculations based upon individual first arrival records. The causes of variation and inaccuracy in these are numerous and in any effort to 'correct' them the personal equation enters unconsciously. We believe, as elsewhere, stated that for accurate comparative studies the combination of a large number of records by different observers from one vicinity is an absolute necessity. Until such material is at hand much of the detailed calculation is futile.

Autumn Birds in Alcona County, Michigan. By J. Claire Wood. An interesting contribution to a little known section of the state. We trust that Mr. Wood will be able to add a supplementary report on the summer birds.

The Nest of the Goldfinch based on Study of the Deserted Nests. By Francis M. Root. Only two out of eleven showed any thistle down in the lining!

A Critique of Barrows' "Michigan Bird Life." By B. H. Swales.— Thirteen species are listed of which there seems to be no positive record of their occurrence in Michigan.

Notes on the Breeding Habits of Agelaius phœniceus. By W. L. Hackett.

Corrections to a Preliminary List of the Summer Birds of Fall River County, Southwestern South Dakota. By S. S. Visher.

The Oölogist. Vol. XXX. No. 3. March 15, 1913.

The Nesting History of a Pair of Golden Eagles. By C. S. Sharpe. Excellent illustrations from photographs.

Nesting of the Prairie Horned Lark in Southern [i. e. south-western] Pennsylvania. By S. S. Dickey.

The Ibis.² X Series. Vol. I, No. 2. April, 1913.

The Birds of Hong Kong, Macoa, and the West River or Si Kiang in South-eastern China, with special reference to their Nidification and Seasonal Movements. Part II. By R. E. Vaughan and K. H. Jones.— This installment includes 79 species and is accompanied by a colored plate of eggs. Among many interesting notes we read that *Halcyon smyrnensis* and *H. pileatus* are much sought by the Chinese "who use their blue feathers for the manufacture of the well-known Kingfisher enamel,' which has been in use in China since the time of Confucius." *Palæornis torquata*

¹ Edited and published by R. M. Barnes, Lacon, Ill.

² Edited for the British Ornithologists' Union, by W. L. Sclater. Published by R. H. Porter, 7 Princes St., Cavendish Sq. W., London.

said to have been accidentally introduced is now well established at Hong Kong.

A Reference List of the Birds of New Zealand. Part I. By Gregory M. Mathews, and Tom Iredale - This is a thorough revision of New Zealand birds with the nomenclature brought into conformity with the International Code, and with the extreme generic subdivision which the authors favor. Numerous notes and explanations, and the more important synonyms are given under each species. We note as new forms: Hydroprogne tschegrava oliveri, Sterna vittata bollonsi, and Sternula nereis davisa. while many other forms here recognized have been described by Mr. Mathews in recent numbers of his 'Birds of Australia' etc. The types of all the genera are definitely cited following the method of the third edition of the A. O. U. Check List. Podiceps we note is used for the Grebes on the claim that Grav's selection of C. arcticus Linn. as the type of Colymbus Linn, 1735 nec 1766 fixes the latter genus on the Loons. So far as we can see Mr. Mathews argument is sound and it is surprising that Gray's change of type in the 1855 edition of his 'List of Genera' should have been entirely overlooked.

Further Notes on the Birds of China. By J. D. La Touche.—Consists of additions to the list of Birds of Chinkiang and additional observations on the birds of Fohkien. Two specimens of the so-called *Junco siemsseni* Martens, previously known from the unique type, were obtained at Kuatun, north-west Fohkien, and the female is described for the first time.

Some Notes and Observations on a Guan (Ortalis vetula), suggested by an Examination of an Immature specimen. By Percy R. Lowe.— This is a very suggestive paper in which the theory is advanced that the Guans represent a type of gallinaceous bird in which the change from an arboreal to a terrestrial life has never been successfully completed. The young are shown to be remarkably well developed when hatched and are in most respects like young of terrestrial gallinaceæ, though certain characters indicate a comparatively recent arboreal life which the adults still follow. Mr. Lowe presents good arguments against the possibliity of this being a 'reversion' or return to the arboreal life.

On Sterna hirundo Linn. and on the Name of the Common Tern. By Einar Lönnberg — Decides that Linnæus referred to the Common Tern and not the Arctic as has been suggested.

Obituary notices of Dr. Edward A. Wilson who perished on Capt. Scott's Antarctic Expedition and Dr. Robert Collett. The former, by the way, was a great nephew of Dr. Thos. B. Wilson at one time president of the Academy of Natural Sciences of Philadelphia well known as a benefactor of that institution and an associate of John Cassin.

Under 'Letters etc.' there is a strong reply to Dr. Sclater's criticism of the new British Hand List by its authors.

Bulletin of the British Ornithologists' Club. 1 No. CLXXXV.

¹ Edited by W. R. Ogilvie Grant. Published by Witherby & Co., 326 High Holborn, London.

List of Melanistic, Albinistic and Hybrid birds exhibited by Hon. W. Rothschild.

The following new forms are described: Turdus swynnertoni Bannerman, Rhodesia; Cypselus pacificus cooki Harrington, Northern Shan States; Acrocephalus taiti, Vint hendersoni and Porzana murrayi described by Ogilvie-Grant from Henderson Island, South Pacific, with remarks on other birds of this little known island. Later, in No. CLXXXVII of the Bulletin it is pointed out that Mr. A. J. North had published a paper on Henderson Island birds in which two of these supposed new forms were named. Vini hendersoni = V. stepheni North and Porzana murrayi = P. atra North.

Bulletin of the British Ornithologists' Club. No. CLXXXVI. New forms described: *Ptilotis ornata wesleydalei* Mathews, southwest Australia; *P.o. underbooli* Mathews Victoria; *Larus fuscus antelius* Iredale, Obi River.

Bulletin of the British Ornithologists' Club. No. CLXXXVII. New forms: Emberiza yessoënsis continentalis Witherby, near Nanking, China; Sitta europaea hispaniensis Witherby, Spain and Portugal.

British Birds. Vol. VI. No. 10. March 1, 1913.

Edward Adrian Wilson. An Appreciation. By W. S. Bruce.

Professor Robert Collett. By A. H. Cocks.

Increase and Decrease in Summer Residents 1912.—Compilation of Reports.

British Birds. Vol. VI. No. 11. April 1, 1913.

Henry John Pearson. A Memoir. By H. W. Feilden.

Notes on Mortality in Nestling Cuckoos. By J. H. Owen—Of 34 young Cuckoos observed in the nest during 1911 and 1912, seventeen came to an untimely end. The ratio, 50 percent, was exactly the same in each year.

Note on the Ejection of the Lining Membrane of the Gizzard by the Curlew. By H. Hammond Smith.—Other birds which possess the same habit are mentioned.

Are Starlings Double or Single Brooded? By N. F. Ticehurst — Some at least were proved to have two broods, by banding and recapture.

British Birds. Vol. VI. No. 12. May 1, 1913.

Early "Drumming" of the Snipe and its Significance. By H. Lynes.—Considers it due to earlier revival of sexual instincts on account of mild winter.

The Lesser Black-backed Gull of the British Isles. By Tom Iredale — An examination of the type of *Larus affinis* Reinhardt shows that it is the same as the recently described *L. fuscus britannicus* Lowe (cf. Bull B. O. C. CLXXXVI.)

"British Diving Ducks." A review of J. G. Millais' recent work by

¹ Edited by H. F. Witherby. Published by Witherby & Co., 326 High Holborn, London.

H. F. Witherby — The reviewer strongly refutes the author's claim of color change in feathers, citing Dr. Strong's papers with which Mr. Millais seems to have been unacquainted. Other points are also discussed at length and the review is really one of the leading papers in the number.

The Avicultural Magazine. Vol. IV. No. 5. March, 1913.

The Sexes of *Liothrix lutea* with Remarks on Modifications of the Species. By. A. G. Butler — colored plate.
