The A.O.U. Endowment Fund

Many of our members recognize the significant place occupied by the Endowment Fund in the finances of The American Ornithologists' Union. Investment funds under one name or another have been part of the Union for over half a century and in the period of rapid post-war inflation have become of vital importance.

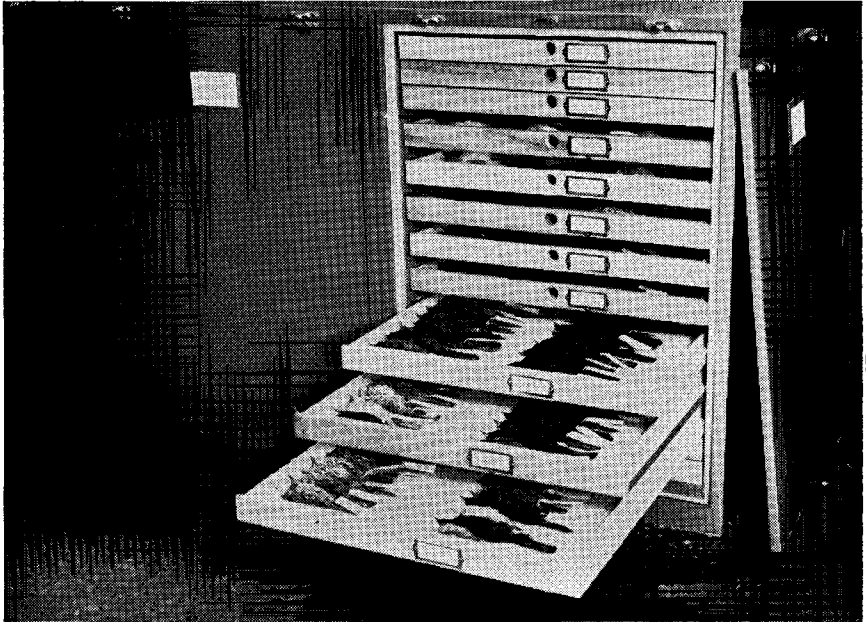

During the past five years, the Union has consistently published volumes of THE AUK of 600 to 700 pages while maintaining the high scientific quality that has made it one of the leading ornithological journals of the world. That the A.O.U. has been able to increase its size in the face of today's high printing costs is due in large measure to the steady increase of its Endowment Fund, which now provides almost 20% of Active Income. However, we cannot afford to be complacent, for costs continue to rise and the endowment must keep pace.

Contributions to the endowment fund (which are tax-deductible) may be made through purchase of Life Memberships, or by gift or bequest. A Life Membership may be obtained by payment of \$150 either in a lump sum or in four annual installments of \$37.50; this privilege is available to all classes of members, and exempts them from further dues. Donations of any size are welcome, and members or friends of the Union who make gifts of \$1,000 are recognized as Patrons, and they too are exempt from dues. Bequests may be left to The American Ornithologists' Union, a non-profit corporation, either in cash or property.

Those who wish to use this opportunity of serving the Union may make their contributions to the Treasurer, along with annual dues or at any time.

TWO NEW ORNITHOLOGICAL MONOGRAPHS

MONOGRAPH No. 2. *A Comparative Study of Some Social Communications Patterns in the Pelicaniformes*, by Gerard Frederick van Tets. 88 pp., 49 text figures. Price \$2.00 (\$1.60 to AOU members).

MONOGRAPH No. 3. *The Birds of Kentucky*, by Robert M. Mengel. Cloth bound, 575 pp., 4 color plates plus text figures and vignettes. Price \$10.00 (\$8.00 to AOU members).

MONOGRAPH No. 1. *A Distributional Study of the Birds of British Honduras*, by Stephen M. Russell. 195 pp., 2 color plates. Price \$4.50 (\$3.60 to AOU members).

Comments by reviewers:

"This nice, solid piece of work makes a fitting lead-off paper for the A.O.U.'s new monograph series." O. L. Austin, Jr. (in *Bird-Banding*).

"A very careful and thorough account of the avifauna of a relatively neglected portion of Central America . . . its usefulness extends considerably beyond the borders of the area with which it deals. Both author and publisher are to be congratulated on a fine first effort." Thomas R. Howell (in *The Wilson Bulletin*).

Like all other AOU publications, *Ornithological Monographs* are shipped prepaid. Make checks payable to "The American Ornithologists' Union." For the convenience of those who wish to maintain complete sets of *Monographs* and to receive new numbers immediately upon issue, standing orders will be accepted. Monograph No. 4 will be "Evolution of Some Arctic Gulls (*Larus*): an Experimental Study of Isolating Mechanisms," by Neal Griffith Smith.

Order from: **Burt L. Monroe, Sr., Treasurer, American Ornithologists' Union, Box 23447, Anchorage, Kentucky 40223**

BIRDS OF THE BLACK HILLS

By Olin Sewall Pettingill, Jr. and Nathaniel R. Whitney, Jr.

Published by the Cornell Laboratory of Ornithology

A comprehensive work detailing the status of the 226 species recorded in the Black Hills of South Dakota and Wyoming and giving specific information on the habitat, nesting, migrations, and general ecology of these species regularly occurring in the area. An introduction describes the topography, climate, and vegetation, summarizes the changes in the environment as a result of man's presence, discusses the distribution and origin of the Black Hills avifauna, and reviews the previous ornithological work. Other features include a map and gazetteer, 8 photographs of habitats, 5 decorative drawings by William C. Dilger, and a stunning cover by George Miksch Sutton. 139 pages. Price \$2.50 (including postage).

**Obtainable from the Laboratory of Ornithology, Cornell University
33 Sapsucker Woods Road, Ithaca, New York 14850**

The Birds of Colombia

By R. MEYER DE SCHAUSENSEE

This indispensable volume describes the 1567 species and 2654 subspecies known from Colombia; it is the only reference for most of Central and South America. 448 pages with 20 pages of paintings (12 in full color) by Earl L. Poole, and 87 line drawings by George Miksch Sutton. End paper maps. Second edition. Price \$10.00.

THE AUK

A Quarterly Journal of Ornithology

ORGAN OF THE AMERICAN ORNITHOLOGISTS' UNION

THE AUK is edited at the Museum of Natural History, The University of Kansas, Lawrence, Kansas 66045, by the following staff:

Editor, ROBERT M. MENOEL; *Assistant Editor*, J. KNOX JONES, JR.

Editorial Assistants, GARY C. PACKARD and DENNIS M. POWER.

The Auk welcomes original articles and short notes, not published elsewhere, containing significant new knowledge about birds, or new interpretation of existing knowledge. Address all articles and notes intended for publication and all books intended for review to the editor.

Suggestions to contributors.—The efficient and economical transmission of knowledge by means of the printed word requires effective participation of author, editor, and printer. In order to facilitate the task of the printer, the editor should receive from authors MSS satisfying the following minimal requirements: *MSS should be typewritten, double-spaced (especially tables and "literature cited"), on one side of numbered sheets of standard (8½ × 11 in.) bond paper, with at least one inch margin all around. Tables (which should be unruled) and legends should be typed on separate sheets. Drawings should be in India ink on good board or drafting papers and lettered by lettering guide or the equivalent. Photographs should be clear, of good contrast, on glossy paper. Illustrations should allow (with particular regard to lettering) for reduction to ½ their original dimensions (final width will usually be 4¼ in.).*

Scientific and (if any) vernacular names of birds should be given upon first mention thereof and should follow the A.O.U. Check-list (1957) or the appropriate equivalent unless departures are explained and defended.

For bird weights and measurements, use metric units. Other measurements should be in the form usual to the discipline of the paper as practiced in the United States. The 24-hour clock and "continental dating (e.g., 1 July 1858) are recommended.

Titles should be short and descriptive. MSS should follow the conventions of form observed in articles, general notes, and reviews in *The Auk*, with minor variations, since 1950. If more than 10 works are cited, references in text should relate to a terminal list of "literature cited" (see *Auk*, vols. 78 or 79 for form; *include no titles not cited*) except in general notes, where citation should normally be in text. Avoid footnotes. *Where critical matter is cited from longer papers, indicate the pertinent pages, e.g. "(Lack, 1947: 96-97)."* Citations in text should be parenthetical, e.g. "(D. Lack. *Darwin's finches*. Cambridge Univ. Press, 1947.)" or "(*Auk*, 79: 251, 1962)." *Verify all citations from original sources unless impossible, in which case so indicate.*

Articles more than 10 pp. long should include a summary that should not exceed 10 per cent of the length of the article.

For abbreviations and minor matters of form see recent issues of *The Auk*. The *Style manual for biological journals* (Washington, D. C., Amer. Inst. Biol. Sci. 1960) is generally useful also. In controversial matters of form *The Auk* frequently relies finally on the dicta of *A manual of style* (Chicago, Univ. Chicago Press, 1949).

Proofs of all articles and notes will be sent to authors. Reprints of articles, notes, and other items are to be paid for by the author. These must be ordered from Allen Press Inc. on the blanks sent with the proof.
