

BIRDS OF COLORADO

by

ALFRED M. BAILEY and ROBERT J. NIEDRACH

Volume I, pp. i-xxii, 1-454, inserts 136 pp. (612 pp.)

Volume II, pp. i-x, 455-895, inserts 112 pp., and map. (563 pp.)

Total pages 1175 (12" × 9" wide)

Illustrated with 124 plates depicting in full color 420 species (approximately 700 individual birds) and over 400 photographs in black and white. The paintings by 23 artists—among them outstanding bird artists of the world—were made especially for *Birds of Colorado*.

Four hundred thirty-nine species and an additional sixty-four subspecies are recorded in the sequence followed in *The Check-list of North American Birds*. The data given for each cover recognition, range, status in Colorado and in the neighboring states of Nebraska, Kansas, New Mexico, Utah, and Wyoming, concluding with a narrative of the life-history activities of each Colorado breeding form.

For more than forty years the authors, Alfred M. Bailey, Director, and Robert J. Niedrach, Curator of Birds, of the Denver Museum of Natural History, have roamed from the prairies to mountain peaks of Colorado at all seasons. In *Birds of Colorado* they have endeavored to present copy primarily of interest to amateur bird observers, but also to professional ornithologists as well. An attempt has been made to give early arrival and late departure dates, where and when to look for each species, its relative abundance, and the nesting habits of breeding summer residents of the state.

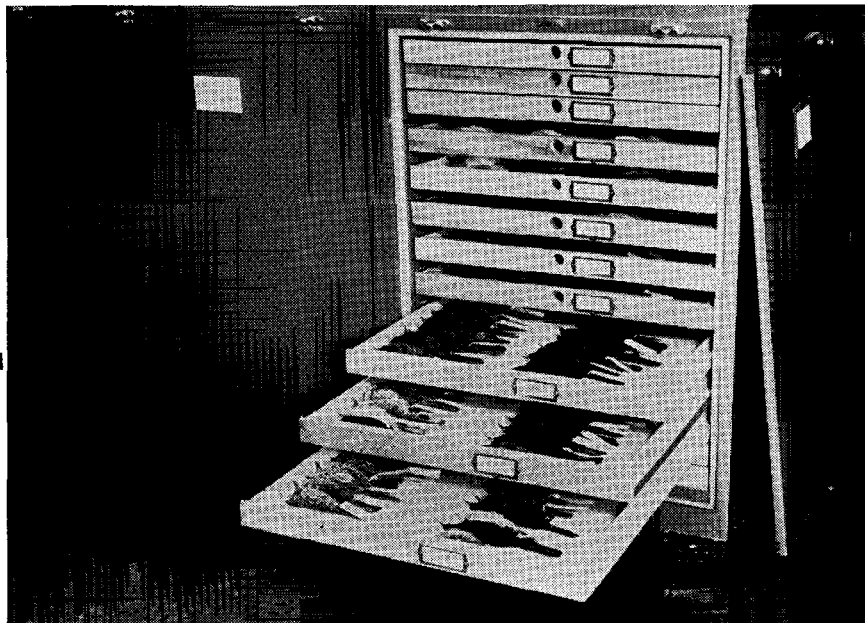

REGULAR EDITION \$35.00

Colorado residents please add 3% sales tax; Denver residents, 5%.

The A.O.U. Endowment Fund

Many of our members recognize the significant place occupied by the Endowment Fund in the finances of The American Ornithologists' Union. Investment funds under one name or another have been part of the Union for over half a century and in the period of rapid post-war inflation have become of vital importance.

During the past five years, the Union has consistently published volumes of THE AUK of 600 to 700 pages while maintaining the high scientific quality that has made it one of the leading ornithological journals of the world. That the A.O.U. has been able to increase its size in the face of today's high printing costs is due in large measure to the steady increase of its Endowment Fund, which now provides almost 20% of Active Income. However, we cannot afford to be complacent, for costs continue to rise and the endowment must keep pace.

Contributions to the endowment fund (which are tax-deductible) may be made through purchase of Life Memberships, or by gift or bequest. A Life Membership may be obtained by payment of \$150 either in a lump sum or in four annual installments of \$37.50; this privilege is available to all classes of members, and exempts them from further dues. Donations of any size are welcome, and members or friends of the Union who make gifts of \$1,000 are recognized as Patrons, and they too are exempt from dues. Bequests may be left to The American Ornithologists' Union, a non-profit corporation, either in cash or property.

Those who wish to use this opportunity of serving the Union may make their contributions to the Treasurer, along with annual dues or at any time.

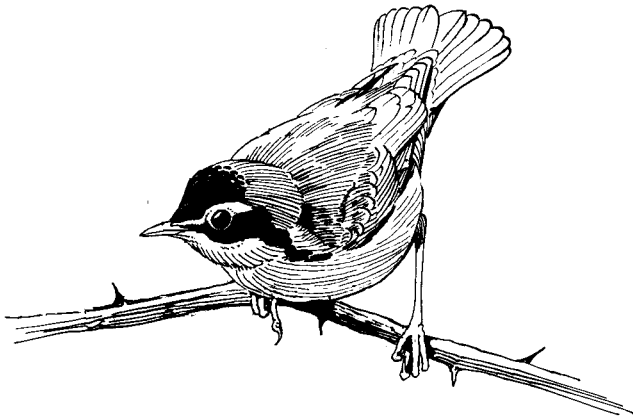

ORNITHOLOGICAL MONOGRAPHS

MONOGRAPH No. 1. *A Distributional Study of the Birds of British Honduras*, by Stephen M. Russell. 195 pp., 2 color plates. Price \$4.50 (\$3.60 to AOU members).

MONOGRAPH No. 2. *A Comparative Study of Some Social Communications Patterns in the Pelecaniformes*, by Gerard Frederick van Tets. 88 pp., 49 text figures. Price \$2.00 (\$1.60 to AOU members).

MONOGRAPH No. 3. *The Birds of Kentucky*, by Robert M. Mengel. Cloth bound, 581 pp., 4 color plates plus text figures and vignettes. Price \$10.00 (\$8.00 to AOU members).

MONOGRAPH No. 4. *Evolution of Some Arctic Gulls (Larus): an Experimental Study of Isolating Mechanisms*, by Neal Griffith Smith. 99 pp., 62 text figures. Price \$2.50 (\$2.00 to AOU members).

Like all other AOU publications, *Ornithological Monographs* are shipped prepaid. Make checks payable to "The American Ornithologists' Union." For the convenience of those who wish to maintain complete sets of *Monographs* and to receive new numbers immediately upon issue, standing orders will be accepted.

Order from: **Burt L. Monroe, Sr., Treasurer, American Ornithologists' Union, Box 23447, Anchorage, Kentucky 40223**

THE AUK

A Quarterly Journal of Ornithology

ORGAN OF THE AMERICAN ORNITHOLOGISTS' UNION

THE AUK is edited at the Museum of Natural History, The University of Kansas, Lawrence, Kansas 66044, by the following staff:

Editor, ROBERT M. MENGEL; *Associate Editor*, MARION ANNE JENKINSON

Editorial Assistants, DAVID M. NILES, DENNIS M. POWER, SIEVERT A. ROHWER, and GARY D. SCHNELL

The Auk welcomes original articles and short notes, not published elsewhere, containing significant new knowledge about birds, or new interpretation of existing knowledge. Address all articles and notes intended for publication and all books intended for review to the editor.

Suggestions to contributors.—The efficient and economical transmission of knowledge by means of the printed word requires effective participation of author, editor, and printer. In order to facilitate the task of the printer, the editor should receive from authors MSS satisfying the following minimal requirements: *MSS should be typewritten, double-spaced (especially tables and "literature cited"), on one side of numbered sheets of standard (8½ × 11 in.) bond paper, with at least one inch margin all around. Tables (which should be unruled) and legends should be typed on separate sheets. Drawings should be in India ink on good board or drafting papers and lettered by lettering guide or the equivalent. Photographs should be clear, of good contrast, on glossy paper. Illustrations should allow (with particular regard to lettering) for reduction to ½ their original dimensions (final width will usually be 4¼ in.).*

Scientific and (if any) vernacular names of birds should be given upon first mention thereof and should follow the A.O.U. Check-list (1957) or the appropriate equivalent unless departures are explained and defended.

For bird weights and measurements, use metric units. Other measurements should be in the form usual to the discipline of the paper as practiced in the United States. The 24-hour clock and "continental dating" (e.g., 1 July 1858) are recommended.

Titles should be short and descriptive. MSS should follow the conventions of form observed in articles, general notes, and reviews in *The Auk*, with minor variations, since 1950. If more than 10 works are cited, references in text should relate to a terminal list of "literature cited" (see *Auk*, vols. 81 or 82 for form; *include no titles not cited*) except in general notes, where citation should normally be in text. Avoid footnotes. *Where critical matter is cited from longer papers, indicate the pertinent pages, e.g. "(Lack, 1947: 96-97)." Citations in text should be parenthetical, e.g. "(D. Lack. Darwin's finches. Cambridge Univ. Press, 1947.)" or "(Auk, 79: 251, 1962)." Verify all citations from original sources unless impossible, in which case so indicate.*

Articles more than 10 pp. long should include a summary that should not exceed 10 per cent of the length of the article.

For abbreviations and minor matters of form see recent issues of *The Auk*. The *Style manual for biological journals* (Washington, D. C., Amer. Inst. Biol. Sci. 1960) is generally useful also. In controversial matters of form *The Auk* frequently relies finally on the dicta of *A manual of style* (Chicago, Univ. Chicago Press, 1949).

Proofs of all articles and notes will be sent to authors. Reprints of articles, notes, and other items are to be paid for by the author. These must be ordered from Allen Press Inc. on the blanks sent with the proof.
