

INDEX TO VOLUME 85

Compiled by Willetta Lueshen

This index is primarily one to new information. Previously published information referred to in this volume has not been indexed unless extensive comparisons or reinterpretations are involved. Also not indexed are the various species of birds mentioned in the Reports of the Committee on Conservation (pp. 117-126 and 669-677). For some species, especially ones not in the A.O.U. Check-list area, scientific names only have been entered, and in some instances entries under scientific names are more extensive than those under vernacular names. New generic, specific, and subspecific names are printed in **boldface** type.
