“Waterfowl of North America” by William Zimmerman

More than a book, this is a collection of 43 limited edition prints (22" by 27-3/4"), bound into a single magnificent volume, signed and numbered by the artist — limited to 1000 copies. The book is covered in fine linen dyed to match the top grain leather spine. Opposite each print is a range map of the species, along with other valuable information. In addition, you will receive two single prints identical to those bound into the volume, suitable for framing.

THE EMU

The quarterly journal of the Royal Australasian Ornithologists Union and the leading journal in Australia devoted to original research and observation on the birds of the Australasian region. Of importance to all ornithologists and institutions because the avifauna is highly endemic with peculiarities of behaviour and breeding not usual elsewhere.

Dues: membership \$A15.00 p.a. (\$A17.00 1st year); institutions \$A25.00 p.a. (\$A27 1st year). All members and institutions subscribing receive THE EMU and the RAOU NEWSLETTER quarterly. The Union has recently published needed revisions of its 1926 Checklist of Australian Birds: *Checklist, Part I, Non-passerines* (\$A11.10) and an *Interim List of passerines* (\$A3.00).

Enquiries to the Secretary, RAOU, 119 Dryburgh St., North Melbourne, Vic. 3051.

THE AUK

A Quarterly Journal of Ornithology

ORGAN OF THE AMERICAN ORNITHOLOGISTS' UNION

THE AUK is edited at the Florida State Museum, University of Florida, Gainesville, Florida 32611, by the following staff:

Editor, OLIVER L. AUSTIN, JR.; *Assistant Editor*, JUNE B. GABALDON

Associate Editors, WALTER BOCK (Reviews), HERBERT W. KALE, II (Periodical Literature), and JUDITH W. MCINTYRE (Index).

THE AUK welcomes original reports dealing with the biology of birds, and emphasizing the documentation, analysis, and interpretation of laboratory and field studies. Contributions dealing with theoretical or methodological developments also are encouraged, as are occasional reviews of existing information or ideas. Contributions are welcomed from throughout the world, but must be written in English.

Submit all contributions for Vol. 95 to the Editor-Elect, John A. Wiens, Department of Zoology, Oregon State University, Corvallis, Oregon 97331 USA.

SUGGESTIONS TO CONTRIBUTORS. Submit the typewritten original and two copies of the text, tables, illustrations, and all other material. *All typewritten material must be double-spaced* on one side of numbered 8½ × 11 inch (21½ × 28 cm) good quality bond paper, with at least 1 inch (2½ cm) margins. Originals typed on erasable, light weight, or mimeo bond will not be considered, but copies may be clear Xerox or carbon reproductions. Number pages through the Literature Cited; include tables and legends for figures on separate unnumbered pages. Avoid footnotes.

The style of manuscripts should conform to general usage in recent issues. A cover page should contain the full title, a shortened version of the title (not to exceed 35 characters in length) for use as a running head, and your address at the time the research was conducted, followed by your present address, if different. The title of the paper should be concise and informative. The cover page should also include the name and full address of the individual to whom proof is to be sent.

Each Article should be preceded by an Abstract not exceeding 5% of the length of the paper. The Abstract should recapitulate the findings of the paper, not describe the work done. Acknowledgments should follow the text and precede the Literature Cited. Scientific and (if any) English names of birds always should be given where first mentioned in the text, and should follow the A.O.U. Check-list of North American Birds (Fifth ed., 1957; 32nd Supplement, Auk 90:411-419; 33rd Supplement, Auk 93:875-879) or the appropriate equivalent unless departures are explained and defended. Metric units should be used in all measurements. In general, abbreviations of statistical terms and mensural units should conform with the Council of Biology Editors (CBE) Style Manual (Third ed., 1972, American Institute of Biological Sciences, 1401 Wilson Blvd., Arlington, Virginia 22209). Use the 24-hour clock (0800 and 2030) and "continental" dating (1 July 1971). In other matters of style the CBE Style Manual, the GPO Style Manual, and recent issues of *The Auk* will be helpful.

Tables, which must not duplicate material in either the text or illustrations, are typewritten (**double-spaced throughout!**) separately from the text. Each table should contain a short but complete heading, and must not contain vertical rulings.

Illustrations (including labels of coordinates) should be on 8½ × 11 inch (21½ × 28 cm) sheets, and must be mailed flat. Copies accompanying the original for use of reviewers should be good quality reproductions of the original illustrations. The name of the author and the figure number should be penciled on the *back* of each figure. Legends should be typed consecutively (double-spaced) on a separate page.

Drawings should be drafted with undiluted india ink, and be large enough to permit ⅓ to ½ reduction to the size that they will appear in print. Graphs may be drafted on coordinate paper ruled with light *blue* lines; do *not* use coordinate paper ruled with *green* lines. Use mechanical lettering, pressure transfer letters, or calligraphy; typewritten lettering is not acceptable. Lettering should be large enough to be easily readable after 50% reduction of the figure, but not overly large. Lettering style should be uniform among all figures for a manuscript, as should the size of lettering following reduction. Avoid bold, heavy, or ornate letters. Photographs should be glossy prints of good contrast and sharpness, and should be approximately the same size as they will appear in print. Letters and arrows on photographs are best applied by pressure-sensitive materials.

In articles containing more than five references, the citations are listed (double-spaced!) in a Literature Cited section following the text and Acknowledgments. For five or fewer references, cite them in the text following these examples: Sauer (1972, Auk 39: 717), or (Sauer 1972, Auk 39: 717). Text citations should include author and year (e.g. Darwin 1858), or, if more than two authors are involved, the first author and year (Jones et al. 1947). If critical matter is cited or quoted directly from longer works, indicate the pertinent pages (e.g. MacArthur 1972: 204-207). Citations of two or more works on the same topic should be cited in chronological order (e.g. Meanley 1971, Dyer 1975). For abbreviations and forms of titles of serial publications, follow the BIOSIS List of Serials (1974, BioSciences Information Service of Biological Abstracts). Consult recent issues of *The Auk* and *The CBE Style Manual* for additional details. A more detailed set of instructions for contributors appeared in *The Auk*, Vol. 94, No. 1 (January 1977), copies of which are available upon request from the Editor-Elect.
