---

The **Raptor Research Foundation** is interested in identifying organizations whose major purpose is to deal with some aspect of the life of raptors. It is RRF's intent to compile the results and provide each responding organization with a copy of this document to facilitate communication, and to make it available to other organizations (e.g. wildlife or conservation agencies, funding agencies).

Officers of organizations are asked to submit the following information for inclusion in **A Directory of Raptor Organizations of the World**: official organization name, address (permanent address, if there is one), brief statement of purpose, approximate number of members, major area(s) of interest (e.g. basic research, captive breeding, conservation, education, falconry, general aspects, raptor movement or rehabilitation), and name and official position of responding individual. This information should be forwarded (on an organizational letterhead, if one is available) to: **Richard J. Clark, Vice President, Raptor Research Foundation, Inc., Department of Biology, York College of Pennsylvania, York, Pennsylvania 17403-3426 USA.**
