## **Cooperative Breeding in Birds**

Long Term Studies of Ecology and Behaviour

**Edited by P.B. Stacey and W.D. Koenig**

Summarizes a wide variety of studies focusing on cooperative breeding among birds, an unusual and rare form of social behavior, in which individuals other than the male-female pairs help to raise the young of a single nest or den.

1990 550 pp. 37298-4 Hardcover \$90.00  
37890-7 Paper \$34.50

## **The Ecology of Bird Communities**

Volumes 1 and 2

**John A. Wiens**

Two volumes synthesize and critically evaluate research on bird communities. Drawing from studies conducted throughout the world, it reviews in detail what is known about the patterns of organization of such communities and the factors, such as competition, predation, past history, climate, habitat, or disturbance, that may determine these patterns.

Vol 1: 1989 540 pp. 26030-2  
Hardcover \$80.00

Vol 2: 1989 315 pp. 36558-9  
Hardcover \$65.00

2-Volume set: 39981-5 Hardcover \$125.00

*Now in paperback...*

## **Farming and Birds**

**Raymond J. O'Connor and Michael Shrubbs**

This unusual study is the cooperative result of a professional ornithologist and a cereal farmer, a combination that provides an objective and informed view of the effect of British agriculture on the bird population.

1987 304 pp. 38973-9 Paper \$19.95

## **Ospreys**

A Natural and Unnatural History

**Alan F. Poole**

**Foreword by**

**Roger Tory Peterson**

"...well researched and written, *Ospreys* should find a place on the serious birder's book shelf...the author has created a definitive work on this unique raptor." —*Naturalist Review*

"The book is for the layperson and specialist alike; it is sure to be the definitive study of ospreys for years to come." —*Indiana Audubon Quarterly*  
1989 272 pp. 30623-X Hardcover \$27.95

## **Birds of Jamaica**

A Photographic Field Guide

**Audrey Downer,**

**Robert L. Sutton, and**

**Yves-Jacques Rey-Millet**

This is the first photographic field guide ever published on birds of Jamaica, including many birds that have never been captured on film. All the species that occur in Jamaica are mentioned, but only endemic species and subspecies, or species unique to the Caribbean region, are described in detail.

1990 128 pp. 38309-9  
Hardcover about \$29.95

## Lovebirds, Cockatiels, Budgerigars:

by J. Lee Kavanau, UCLA

## BEHAVIOR & EVOLUTION

- ▶...highly informative volume...actually several books under one cover...[the author has] enormous experience with the raising of these birds....presenting a great deal of interesting information, much of it new. Prof. Ernst Mayr, Harvard Univ.
- ▶...unique, exhaustive laboratory studies of..behavior...insightful and remarkably comprehensive scenario of..origin & evolution of birds &..roots of their behaviors....must reading for all interested in avian behavior & reproduction....wealth of information & concepts that will be of interest to all evolutionists. Prof. E. C. Olson, UCLA
- ▶....enormous amount of information....very important contribution to..study of behavior of parrot birds, about which so little is known... Prof. K. Immelmann, Univ. Bielefeld
- ▶....monumental in..scope...much fascinating reading...many intriguing subjects....enormous project....excellent reference for..experimental behavior or evolutionary science....looking forward to..in-depth study &..to apply [the author's] concepts to...aviculture and avian veterinary medicine. G. J. Harrison, DVM, Bird World, Nov., 1987
- ▶....offers an interesting synthesis of avian evolution, in general, tying together [the author's] views on evolutionary sequences involved in thermoregulation, insulation, egg care, care of young, mode of feeding, and degree of arboreality. Auk, July, 1988
- ▶....scope..is impressive....information conveyed..is almost overwhelming....comprehensive discussions on..behavior, morphology, physiology, ecology, biogeography, and evolution of all birds.....extremely detailed discussion of the avian brain.....fascinating ideas on the evolution of bird reproductive behavior.....should provide much fuel for thought & some debate among students of avian evolution.....detailed descriptions of captive bird breeding and experimentation provide numerous ideas for..research on captive birds..... a must for anyone seriously interested in avian evolution... Wilson Bull., Sept., 1989

March, 1987, xxvi + 1,001 pp., 7 indices, 1,455 refs., \$49.95

Prepay ck. or m/o. Add \$4 p/h (\$6 outside U.S.) + \$3.25 s/t in Calif.

# American Warblers

An Ecological and Behavioral Perspective

DOUGLASS H. MORSE

Douglass Morse, a prominent avian ecologist brings together an up-to-date account of three decades of research and debate on the ecological and behavioral aspects of the Parulinae—the “New World” or “American” warblers.

Beginning with a brief overview of their evolutionary history and their dispersal through North and South America, he documents the life cycle of the birds on both their breeding grounds and their migration routes.

Foraging, habitat selection, mating, reproduction, plumage, rare and tropical species, and diversity are just a few of the many subjects covered in this broad and amply illustrated synthesis. 60 line illus., \$30.00 cloth

## *The Journals of the British Ecological Society*

### **JOURNAL OF ECOLOGY**

Edited by J.A. Lee, J. White and  
J. Etherington

*The Journal of Ecology* is one of the world's oldest and most respected publications in the science. The objects of the journal are: (1) to foster and promote the study of vegetation and ecology, especially in the British Isles; (2) to afford an outlet for original work on these subjects; (3) as far as possible to present a record of the commentary on the progress of these studies throughout the world. The journal includes the series Biological Flora of the British Isles, which appear in most issues of the journal but are also available as separate offprints on standing orders.

### **JOURNAL OF ANIMAL ECOLOGY**

Edited by B. Shorrocks and J.M. Elliott

This leading international journal publishes papers on original research in all branches of animal ecology. A balance is sought between aquatic and terrestrial environments, between invertebrates and vertebrates, and between theoretical, experimental and analytical approaches to soundly-based field data. Occasional purely descriptive, theoretical or review papers may be published at the discretion of the editors on animals or concepts of special interest or as part of an extensive development of a subject or as an adjunct to a long-term project.

#### **Subscription Information**

The *Journal of Ecology* is published quarterly, the *Journal of Animal Ecology* and *Journal of Applied Ecology* are published three times a year and *Functional Ecology* is published bi-monthly. The subscription rates for 1990 are, for each one: £99.50 (UK), £119.00 (overseas) and US\$198.00 (USA & Canada) post free.

*Subscriptions and free specimen copies are available from:*

### **JOURNAL OF APPLIED ECOLOGY**

Edited by W.C. Block, J. Miles and N.R. Webb

The journal publishes the results of original research in which ecological ideas and methods are applied to the study, conservation, management, control, development and use of natural resources in the widest sense. The editors select for publication only material of the highest scientific standards and this policy has attracted contributions by the world's leading authorities.

### **FUNCTIONAL ECOLOGY**

Edited by P. Calow and J. Grace

*Functional Ecology* publishes short, original papers in a wide range of ecological topics, but particularly emphasizing the fields of physiological, biophysical and evolutionary ecology. Papers may describe experimental, observational or theoretical studies on terrestrial, freshwater or marine systems. The Editors are especially keen to publish papers that blend between these subject areas. Work that is purely descriptive and/or concerned exclusively and specifically with the population dynamics of organisms will not be accepted unless it sheds light on those specific areas mentioned above.

# IBIS

*Journal of the British Ornithologists' Union*  
Edited by **Dr Peter Jones**  
*Department of Forestry and Natural Resources, University of Edinburgh,  
King's Buildings, Edinburgh EH9 3JU, UK*

One of the most prestigious bird journals in the world, *Ibis* has been in existence since 1859. It publishes papers from both professionals and amateurs on all aspects of ornithology ranging from geographical distribution to bird behaviour, covering topics such as kin selection, altruism and breeding systems. Reviews of

the ornithological literature have always been an important feature of the journal. Although it is published for the British Ornithologists' Union it is by no means exclusively British, and less than half the papers deal with British birds.

### **Subscription Information**

*Ibis* is published quarterly. Subscription rates for 1990 are £80.00 (UK), £96.00 (overseas) and US\$159.50 (USA & Canada) post free.

Order from: Max C. Thompson, Assistant to the Treasurer A.O.U., Department of Biology, Southwestern College, 100 College Street, Winfield, KS 67156. Orders must be prepaid, in U.S. dollars; add 5 percent (minimum \$2.00) handling and shipping charge in U.S., and 20 percent (minimum \$3.00) for all other countries. Make checks payable to American Ornithologists' Union. Prices in parentheses are for A.O.U. members.

# THE AUK

## A Quarterly Journal of Ornithology

PUBLISHED BY THE AMERICAN ORNITHOLOGISTS' UNION

*Editor:* ALAN H. BRUSH, Department of Physiology and Neurobiology, University of Connecticut, Storrs, Connecticut 06268.

*Copy Editor:* GAIL W. HUNTER

*Associate Editors:* FRED E. LOHRER AND JOHN L. TRAPP (Recent Ornithological Literature), M. ROSS LEIN AND BRUCE M. BEEHLER (Book Reviews)

THE AUK welcomes original reports dealing with the biology of birds, emphasizing the documentation, analysis, and interpretation of laboratory and field studies, theoretical or methodological developments, or reviews of existing information or ideas. Contributions are encouraged from throughout the world, but must be written in English.

**SUGGESTIONS TO CONTRIBUTORS.** Submit the typewritten original and two copies of the text, tables, and all other material to the Editor. Every manuscript must be accompanied by a **letter of transmittal** (1988, *Auk* 105: 803). Three copies of illustrations should be submitted. *All typewritten material must be double-spaced* on one side of numbered 8½ × 11 inch (21½ × 28 cm) good quality bond paper, with at least 1 inch (2½ cm) margins. Originals typed on erasable, light weight, or mimeo bond will not be considered, but copies may be clear reproductions. Number pages through the Literature Cited. Avoid footnotes. The style of manuscripts should conform to general usage in recent issues. A cover page should contain the full title, a shortened version of the title (not to exceed 35 characters in length) for use as a running head, and your address at the time the research was conducted. Your present address, if different, should be given at the bottom of the first text page. The cover page should include the name and full address of the individual to whom proof is to be sent.

Each article should be preceded by an Abstract not exceeding 5% of the length of the paper. The Abstract should recapitulate the findings of the paper, not describe the work done. Acknowledgments should follow the text and precede the Literature Cited. Scientific and English names of birds always should be given where first mentioned in the text, and should follow *The A.O.U. Checklist of North American Birds* and supplements or the appropriate equivalent unless departures are explained and defended. SI metric units should be used in all measurements. In general, abbreviations of statistical terms and mensural units should conform with the Council of Biology Editors' *CBE Style Manual*, 5th ed. Use the 24-hour clock (0800 and 2030) and "continental" dating (1 July 1971).

*Tables*, which must not duplicate material in either the text or illustrations, are typewritten (**double-spaced throughout!**) separately from the text. Each table should contain a short but complete heading, and must not contain vertical rulings. *Illustrations* (including labels of coordinates) should be on 8½ × 11 inch (21½ × 28 cm) sheets, and must be mailed flat. The name of the author and the figure number should be penciled on the *back* of each figure. Legends should be typed consecutively (double-spaced) on a separate page. Drawings should be drafted with undiluted india ink, and be large enough to permit ½ to ⅓ reduction to the size that they will appear in print. Graphs may be drafted on coordinate paper ruled with light *blue* lines; do *not* use coordinate paper ruled with *green* lines. Use mechanical lettering, pressure transfer letters, or calligraphy; typewritten lettering is not acceptable. Lettering should be large enough to be easily readable after 70% reduction of the figure, but not overly large. Lettering style should be uniform among all figures for a manuscript, as should the size of lettering following reduction. Photographs should be glossy prints of good contrast and sharpness, and should be approximately the same size as they will appear in print. Letters and arrows on photographs are best applied by pressure-sensitive materials. The *Auk* is published in a double-column format; give careful attention to designing your tables and illustrations accordingly.

Literature citations for **all** manuscripts are listed (double-spaced!) in a Literature Cited section following the text and Acknowledgments. Text citations should include author and year (e.g. Darwin 1858), or, if more than two authors are involved, the first author and year (Jones et al. 1947). If critical matter is cited or quoted directly from longer works, indicate the pertinent pages (e.g. MacArthur 1972: 204). Citations of two or more works on the same topic should be cited in chronological order (e.g. Meanley 1971, Dyer 1975). For abbreviations and forms of titles of serial publications, follow the BIOSIS List of Serials. Consult recent issues of *The Auk* and the *CBE Style Manual* for additional details.

A more detailed set of instructions for contributors appeared in *The Auk*, Vol. 105, No. 1 (January 1988), copies of which are available from the Editor.

# Bioacousticians

## Your workstation is here.

The DSP Sona-Graph™, model 5500 is a signal analysis workstation designed for the acquisition, processing and display of time-varying biological signals. The 5500 acquires, analyzes and displays signals in real-time with a continuous scrolling display, combining the features of a real-time spectrograph, a high-speed dual channel FFT and a computer-based data acquisition system.

It's a "wish list" workstation for the bioacoustician. The 5500 includes digital anti-aliasing filters, 16 bit A/D and 1.5 Mbytes of ROM storage for signal processing programs. Designed with you in mind, the 5500 provides up to 8 Mbytes of signal storage (one or two signals), on-screen cursors, extensive editing, high fidelity playback and computer interface capabilities.

- ✓ Two channel simultaneous display
- ✓ Real-time to 32 kHz
- ✓ Continuous thermal printing
- ✓ On-screen noise reduction feature
