Lovebirds, Cockatiels, Budgerigars: **BEHAVIOR & EVOLUTION**

by J. Lee Kavanau, UCLA

- ▶...highly informative volume...actually several books under one cover...[the author has] enormous experience with the raising of these birds....presenting a great deal of interesting information, much of it new. Prof. Ernst Mayr, Harvard Univ.
- ▶...unique, exhaustive laboratory studies of..behavior...insightful and remarkably comprehensive scenario of..origin & evolution of birds &..roots of their behaviors....must reading for all interested in avian behavior & reproduction....wealth of information & concepts that will be of interest to all evolutionists. Prof. E. C. Olson, UCLA
- ▶...enormous amount of information...very important contribution to..study of behavior of parrot birds, about which so little is known... Prof. K. Immelmann, Univ. Bielefeld
- ▶...monumental in..scope...much fascinating reading...many intriguing subjects....enormous project....excellent reference for..experimental behavior or evolutionary science....looking forward to..in-depth study &..to apply [the author's] concepts to...aviculture and avian veterinary medicine. G. J. Harrison, DVM, Bird World, Nov., 1987
- ▶...offers an interesting synthesis of avian evolution, in general, tying together [the author's] views on evolutionary sequences involved in thermoregulation, insulation, egg care, care of young, mode of feeding, and degree of arboreality. Auk, July, 1988
- ▶...scope..is impressive.....information conveyed..is almost overwhelming....comprehensive discussions on..behavior, morphology, physiology, ecology, biogeography, and evolution of all birds.....extremely detailed discussion of the avian brain.....fascinating ideas on the evolution of bird reproductive behavior.....should provide much fuel for thought & some debate among students of avian evolution.....detailed descriptions of captive bird breeding and experimentation provide numerous ideas for..research on captive birds.... a must for anyone seriously interested in avian evolution... Wilson Bull., Sept., 1989

**POSTDOCTORAL FELLOWSHIP
AT THE
AMERICAN MUSEUM OF NATURAL HISTORY**

The Frank M. Chapman Memorial Fund Committee welcomes applications for the Postdoctoral Fellowship Program in the areas of evolutionary and systematic ornithology. The Fellowship is usually for one year, but applicants may apply for two years, with a review of performance after the first year.

Deadline for applications is 15 January.

For application form and brochure, please write to:

Frank M. Chapman Memorial Fund

Department of Ornithology / American Museum of Natural History
Central Park West at 79th Street New York, New York 10024-5192, U.S.A.

JIM FLEGG'S FIELD GUIDE TO THE BIRDS OF BRITAIN AND EUROPE

By **JIM FLEGG**. With photographs by **ERIC** and **DAVID HOSKING**. This field guide identifies, describes, and illustrates more than 430 species of birds, covering almost all the species in the whole of Britain and Europe. 500 color photos, 400 distribution maps, 400 abundance diagrams. \$43.50 cloth, \$19.95 paper

AFRICAN BIRDS OF PREY

By **WARWICK TARBOTON**. With photographs by **PETER** and **BEVERLY PICKFORD**. This book, a truly magnificent photographic record, combines an exceptional collection of photographs of African birds of prey and an intelligently written and well-researched text. 170 color photos, 82 maps. \$45.00

A GUIDE TO THE BIRDS OF COSTA RICA

By **F. GARY STILES** and **ALEXANDER F. SKUTCH**. Illustrated by **DANA GARDNER**. "A publishing triumph. . . . [This book] sets a new standard for field guide utility and comprehensiveness."—*Naturalist Review*. 52 color plates, 43 b&w illus., \$65.00 cloth, \$35.00 softcover

SEABIRDS OF HAWAII *Natural History and Conservation*

By **CRAIG S. HARRISON**. "A fascinating book. Not only is it a pleasure to read, but it also gives us a wealth of new information and insights about these pelagic species of the mid-Pacific. Every seabird buff, from the amateur to the academic, should have it." —Roger Tory Peterson. 41 color plates, 21 b&w illus., 8 maps. \$36.50 cloth, \$15.95 paper

A BIRDER'S GUIDE TO JAPAN

By **JANE WASHBURN ROBINSON**. Apart from essential background information for the visitor to Japan's birding areas, this book also identifies places where scarce and highly local species occur. 57 maps. \$14.95 paper

THE SEA AND THE ICE

A Naturalist in Antarctica

By **LOUIS J. HALLE**. With a new Foreword by **FRANK H. T. RHODES**. "Halle's chief interest is the sea birds of the region, such as the Wandering Albatross and various petrels, but he also includes a good deal of Antarctic lore and history. A thoroughly pleasurable book."—*New York Times Book Review*. 28 b&w illus., \$12.95 paper

T & AD Poyser Titles

Now Published by Academic Press

Coming in March...

Red Data Birds in Britain

compiled by

**The Nature Conservancy Council and
the Royal Society for the Protection of Birds**

illustrated by

Ian Willis

This book identifies Britain's rare, vulnerable, and endangered species as well as those for which we have an international responsibility. Over 100 species have been identified for inclusion.

February 1991, c. 300 pp., \$35.00 (tentative)
Order Code: 784656-5

Birds and Forestry

Mark Avery and Roderick Leslie

with a Foreword by

David Bellamy

CONTENTS: Introduction. Birds in Forests. Managing the Forest. Conservation Management. The Birds of the Uplands. The Effects of Afforestation on Upland Birds. Case Studies. Money and Power in the Uplands. The Future. **Appendices:** List of Bird Names. List of Mammal Names. List of Plant Names. Index.

December 1990, 320 pp., \$35.00
Order Code: 784658-1

The Kestrel

Andrew Village

illustrated by

Keith Brockie

Dr. Village's book is an inviting combination of readability and scholarship that reflects his dedication and enthusiasm for *Falco tinnunculus*. His research covers various parts of Europe, including the Scottish hill country and eastern England.

1990, 352 pp., \$35.00/Order Code: 784654-9

The Manx Shearwater

Michael Brooke

The breeding biology, vocal behavior, transequatorial migrations, and population dynamics of Manx Shearwaters are described in detail and compared, showing how the various species have adapted to local conditions worldwide.

1990, 264 pp., \$32.50/Order Code: 784657-3

Birds by Night

Graham Martin

The author achieves an insight into the sensory problems posed by a nocturnal lifestyle and the strategies and specialization which have evolved in response.

December 1990, c. 240 pp., \$35.00
Order Code: 784659-X

Man and Wildfowl

Janet Kear

jacket illustrations by

Joe Blossom

Dr. Kear covers a wide range of topics, from a history of domestication, to wildfowling, decoys, conservation and captive breeding, conflicts with agriculture, and wildfowl in legend and literature.

November 1990, 288 pp., \$35.00
Order Code: 784655-7

THE AUK

A Quarterly Journal of Ornithology

PUBLISHED BY THE AMERICAN ORNITHOLOGISTS' UNION

Editor: ALAN H. BRUSH, Department of Physiology and Neurobiology, University of Connecticut, Storrs, Connecticut 06269.

Copy Editor: GAIL W. HUNTER

Associate Editors: JOHN L. TRAPP (Recent Ornithological Literature) AND BRUCE M. BEEHLER (Book Reviews)

THE AUK welcomes original reports on the biology of birds. Appropriate topics include the documentation, analysis, and interpretation of laboratory and field studies, theoretical or methodological developments, and reviews of information or ideas. Contributions written in English are encouraged from throughout the world.

SUGGESTIONS TO CONTRIBUTORS

Manuscript preparation.—Submit the original and two clear copies of the text, tables, and all other text materials along with a letter of transmittal (Auk 105: 803), and three copies of all illustrations (retain original figures). Double-space all written material (including tables and figure legends) on one side of 8½ × 11 inch (21.5 × 28 cm) good quality bond paper, with at least 1 inch (2.5 cm) margins. Number pages through the Literature Cited. Do not right justify. Type tables separately from the text; type figure legends consecutively on one sheet. Mail figures flat and on text-sized sheets with your name and figure number penciled on the back. Do not use boldface, italics, or reduced type. Signify italics by underlining.

Manuscript style.—The style of manuscripts should conform to general usage in recent issues. The title page contains the full title (avoid colons or questions, please) and author's name and address at the time of research. The present address, if different, is given in a footnote. The cover page includes the name and mailing address of the individual to whom proof is to be sent, and a shortened version of the title (<36 characters).

An Abstract (<5% of the paper length) that summarizes important premises, recapitulates your findings, and gives your conclusions precedes each regular article. In articles, text citations should include author and year (e.g. Darwin 1858, Wolter and Hunter 1968, Mayr et al. 1989); multiple citations on the same topic are arranged chronologically. Quotations and citations from longer works require page numbers (Matthew 1976: 193). Acknowledgments follow the text and precede the Literature Cited. Abbreviations of titles of serial publications are found in "Serial Sources for the BIOSIS Data Base." Scientific and English names of birds are given at first mention, and they follow the AOU "Check-list of North American Birds" and supplements unless departures are explained and defined. All measurements are in SI metric units. In general, abbreviations of statistical terms and mensural units conform to the latest Council of Biological Editors' "CBE Style Manual." Use the 24-hour clock (0800 and 2035) and continental dating (29 September 1934).

Tables and figures.—Tables and figures must not duplicate material in either the text or each other. Each table requires a short but complete heading and no vertical rules. Illustrations must allow reduction to one-column (16 pica) width or, if necessary, 26-pica (11 cm) width—without reduction in clarity or readability. Style and size among figures should be uniform. Typewritten lettering is not acceptable on figures. Computer-generated figures of good contrast and sharpness on bond paper are encouraged. Drawings should be prepared with undiluted india ink. Photographs should be glossy prints of the highest possible quality, and approximately the same size as they will appear in print. Letters, arrows, and symbols on photographs are best applied by pressure-sensitive materials. Color figures will be considered both as figure plates and for the frontispiece.

Copies of a more detailed set of instructions (Auk 105: 231) are available from the Editor.
