The Frank M. Chapman Memorial Fund Committee welcomes applications for the Postdoctoral Fellowship Program in the areas of evolutionary and systematic ornithology. The Fellowship is usually for one year, but applicants may apply for two years, with a review of performance after the first year.

Deadline for applications is 15 January.

For application form and brochure, please write to:

Frank M. Chapman Memorial Fund
Department of Ornithology / American Museum of Natural History
Central Park West at 79th Street New York, New York 10024-5192, U.S.A.

An expanding list of ornithology titles.

The Magpies

The Ecology and Behavior of Black-billed and Yellow-billed Magpies

T.R. Birkhead

Studies in Europe and North America from the past fifteen years have successfully revealed the intricacies of the magpie way of life. **The Magpies** covers all aspects of their lives, including behavior, breeding success, and their controversial relationship with man. The text is supported by numerous photographs, diagrams and tables, and superb illustrations by David Quinn.

May 1991, c. 320 pp.

\$39.95 (tentative)/Order Code: 784667

New...

A Complete Checklist of the Birds of the World

SECOND EDITION

Richard Howard and Alick Moore

Highlights include:

- The most up-to-date list of the world's birds
- Covers their distribution using traditional taxonomy
- The only single-volume reference to include subspecies
- Thoroughly revised and updated
- Lists approximately 9,200 species and their subspecies

May 1991, c. 700 pp.

\$49.00 (tentative)/ISBN: 0-12-356910-9

The Ruff

Individuality in a Gregarious Wading Bird

Johan G. van Rhijn

illustrated by
Ian Willis

The ruff is a fascinating species whose elaborate breeding behavior has captivated ornithologists for decades. Strands of evidence for all aspects of the ruff's life come together to give insight into this important area of biology. Specialists and birdwatchers alike will have much to learn from this intriguing story and the insights it provides.

March 1991, 224 pp., \$39.95

Order Code: 784662

New...

The Petrels

Their Ecology and Breeding Systems

John Warham

This well-illustrated general introduction to the petrels forms an accessible and invaluable reference to both the scientific and lay ornithologist. The opening chapters summarize the biology of each family before going on to look in detail at comparative aspects of their breeding ecology.

March 1991, 448 pp., \$59.95

ISBN: 0-12-735420-4

Named Book of the Year 1990 by
Britain's Natural World Magazine...

Man and Wildfowl

Janet Kear

jacket illustrations by
Joe Blossom

Dr. Kear covers a wide range of topics, from a history of domestication, to wildfowling, decoys, conservation and captive breeding, conflicts with agriculture, and wildfowl in legend and literature. The

well-illustrated text is full of insights that will intrigue the reader and reflect the author's scholarship and affection for her subject.

1990, 288 pp., \$39.95

SPECIAL SALE

Take advantage of Carnegie Museum's inventory reduction sale. All scientific publications issued prior to 1985 are available at a 50% discount. Examples are:

- **The birds of the Ligonier Valley**, by R. Leberman, 1976, 67 pp., Special Publication no. 3; list \$5.00, now \$2.50
- **West Virginia birds, distribution and ecology**, by G. Hall, 1983, 180 pp., Special Publication no. 7; list \$20.00, now \$10.00
- **Species of special concern in Pennsylvania**, edited by H. Genoways and F. Brenner, 1985, 430 pp., Special Publication no. 11; list \$30.00, now \$15.00
- **Appendicular myology and relationships of the New World nine-primaried oscines (Aves: Passeriformes)**, by R. Raikow, 1978, 43 pp., Bulletin no. 7; list \$5.00, now \$2.50

These and many other titles are available in ornithology, vertebrate and invertebrate paleontology, mammalogy, botany, herpetology, ichthyology, invertebrate zoology, and anthropology. Write for listings in your area of interest.

The Birds of JAPAN

Mark A. Brazil
Illustrations by
Masayuki Yabuuchi

The first fully comprehensive review of Japanese avifauna in more than 30 years,

The Birds of Japan is based on 10 years of field work and research. In species accounts comprising the bulk of the book, Brazil provides details of past and current distribution, migration, ecology, behavior, and voice. A distribution map accompanies each species account.

May 8 color plates, 53 line drawings, 400 maps 400 pp.
Cloth: 1-56098-030-3 \$49.95

The BALD EAGLE

HAUNTS AND HABITS OF
A WILDERNESS MONARCH

Jon M. Gerrard and
Gary R. Bortolotti

"A delightful, informative, and well-written book. . . . Both the layman and professional will enjoy and benefit from it."—*The Wilson Library Bulletin*

1988 224 pp. 70 b&w illus. Cloth: 0-87474-450-4
\$27.00 Paper: 0-87474-451-2 \$13.95

The Birds of CHINA

Rodolphe Meyer de Schauensee

"Essential for anyone making an ornithological field trip to China. It is a valuable addition to any ornithological library."—*The Wilson Library Bulletin*

The first guide in English, this book describes all 1,195 species and contains a history of ornithology in China.

1984 602 pp. 38 color, 39 b&w illus. Paper: 0-87474-363-X \$37.00

THE BIRDS OF JAPAN

HAWKS, EAGLES, & FALCONS

OF NORTH AMERICA

Paul A. Johnsgard

The definitive volume on North American hawks and falcons by the author of more than 25 books, including *Hummingbirds of North America*.

1990 464 pp. 39 color, 102 b&w illus.
Cloth: 0-87474-682-5 \$45.00

North American OWLS

BIOLOGY AND NATURAL HISTORY

Paul A. Johnsgard

Watercolors by Louis Agassiz Fuertes

"Comprehensive, sound, and current. . . .

The accounts are well balanced and informative."—*The Auk*

"Of the numerous books on North American owls, this is certainly the best and most

comprehensive."—*The*

Wilson Library Bulletin

Accurate and detailed accounts of the 19 owl species that breed north of Mexico.

1988 336 pp. 32 color, 58 line drawings, 20 maps
Cloth: 0-87474-560-8 \$45.00

A leader in its field

Behavioral Ecology and Sociobiology

Managing Editor:

K. Eduard Linsenmair, Würzburg

Editors:

**John Alcock, Tempe, AZ; Jack W. Bradbury, La Jolla, CA;
Ross H. Crozier, Kensington; N.S.W.; Peter Marler, New York, NY;**
together with an international advisory board.

The journal publishes original contributions dealing with quantitative empirical and theoretical studies in the field of the analysis of animal behavior on the level of the individual, population and community. Special emphasis is placed on the proximate mechanisms, ultimate functions and evolution of ecological adaptations of behavior.

Aspects of particular interest:

- Intraspecific behavioral interactions, with special emphasis on social behavior
- Interspecific behavioral mechanisms, e.g., of competition and resource partitioning, mutualism, predator-prey interactions, parasitism
- Behavioral ecophysiology
- Orientation in space and time
- Relevant evolutionary and functional theory

Lovebirds, Cockatiels, Budgerigars:

by J. Lee Kavanau, UCLA

BEHAVIOR & EVOLUTION

- ▶...highly informative volume...actually several books under one cover...[the author has] enormous experience with the raising of these birds....presenting a great deal of interesting information, much of it new. Prof. Ernst Mayr, Harvard Univ.
- ▶...unique, exhaustive laboratory studies of..behavior...insightful and remarkably comprehensive scenario of..origin & evolution of birds &..roots of their behaviors....must reading for all interested in avian behavior & reproduction....wealth of information & concepts that will be of interest to all evolutionists. Prof. E. C. Olson, UCLA
- ▶.....enormous amount of information....very important contribution to..study of behavior of parrot birds, about which so little is known... Prof. K. Immelmann, Univ. Bielefeld
- ▶...monumental in..scope...much fascinating reading...many intriguing subjects...enormous project....excellent reference for..experimental behavior or evolutionary science....looking forward to..in-depth study &..to apply [the author's] concepts to...aviculture and avian veterinary medicine. G. J. Harrison, DVM, Bird World, Nov., 1987
- ▶...offers an interesting synthesis of avian evolution, in general, tying together [the author's] views on evolutionary sequences involved in thermoregulation, insulation, egg care, care of young, mode of feeding, and degree of arboreality. Auk, July, 1988
- ▶.....scope..is impressive.....information conveyed..is almost overwhelming.....comprehensive discussions on..behavior, morphology, physiology, ecology, biogeography, and evolution of all birds.....extremely detailed discussion of the avian brain.....fascinating ideas on the evolution of bird reproductive behavior.....should provide much fuel for thought & some debate among students of avian evolution.....detailed descriptions of captive bird breeding and experimentation provide numerous ideas for..research on captive birds..... a must for anyone seriously interested in avian evolution... Wilson Bull., Sept., 1989

American Warblers

An Ecological and Behavioral Perspective

DOUGLASS H. MORSE

Douglass Morse, a prominent avian ecologist brings together an up-to-date account of three decades of research and debate on the ecological and behavioral aspects of the Parulinae—the “New World” or “American” warblers.

Beginning with a brief overview of their evolutionary history and their dispersal through North and South America, he documents the life cycle of the birds on both their breeding grounds and their migration routes.

Foraging, habitat selection, mating, reproduction, plumage, rare and tropical species, and diversity are just a few of the many subjects covered in this broad and amply illustrated synthesis. 60 line illus., \$30.00 cloth

Editor: ALAN H. BRUSH, Department of Physiology and Neurobiology, University of Connecticut, Storrs, Connecticut 06269.

Copy Editor: GAIL W. HUNTER

Associate Editors: JOHN L. TRAPP (Recent Ornithological Literature) AND BRUCE M. BEEHLER (Book Reviews)

THE AUK welcomes original reports on the biology of birds. Appropriate topics include the documentation, analysis, and interpretation of laboratory and field studies, theoretical or methodological developments, and reviews of information or ideas. Contributions written in English are encouraged from throughout the world.

SUGGESTIONS TO CONTRIBUTORS

Manuscript preparation.—Submit the original and two clear copies of the text, tables, and all other text materials along with a letter of transmittal (Auk 105: 803), and three copies of all illustrations (retain original figures). Double-space all written material (including tables and figure legends) on one side of 8½ × 11 inch (21.5 × 28 cm) good quality bond paper, with at least 1 inch (2.5 cm) margins. Number pages through the Literature Cited. Do not right justify. Type tables separately from the text; type figure legends consecutively on one sheet. Mail figures flat and on text-sized sheets with your name and figure number penciled on the back. Do not use boldface, italics, or reduced type. Signify italics by underlining.

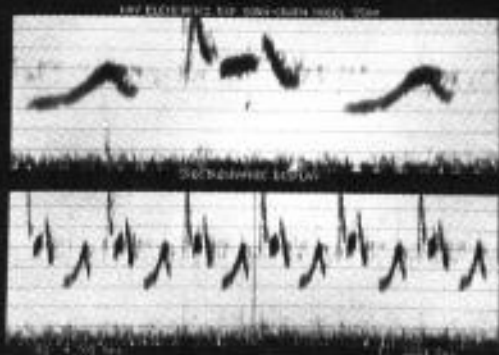

Manuscript style.—The style of manuscripts should conform to general usage in recent issues. The title page contains the full title (avoid colons or questions, please) and author's name and address at the time of research. The present address, if different, is given in a footnote. The cover page includes the name and mailing address of the individual to whom proof is to be sent, and a shortened version of the title (<36 characters).

An Abstract (<5% of the paper length) that summarizes important premises, recapitulates your findings, and gives your conclusions precedes each regular article. In articles, text citations should include author and year (e.g. Darwin 1858, Wolter and Hunter 1968, Mayr et al. 1989); multiple citations on the same topic are arranged chronologically. Quotations and citations from longer works require page numbers (Matthew 1976: 193). Acknowledgments follow the text and precede the Literature Cited. Abbreviations of titles of serial publications are found in "Serial Sources for the BIOSIS Data Base." Scientific and English names of birds are given at first mention, and they follow the AOU "Check-list of North American Birds" and supplements unless departures are explained and defined. All measurements are in SI metric units. In general, abbreviations of statistical terms and mensural units conform to the latest Council of Biological Editors' "CBE Style Manual." Use the 24-hour clock (0800 and 2035) and continental dating (29 September 1934).

Tables and figures.—Tables and figures must not duplicate material in either the text or each other. Each table requires a short but complete heading and no vertical rules. Illustrations must allow reduction to one-column (16 pica) width or, if necessary, 26-pica (11 cm) width—without reduction in clarity or readability. Style and size among figures should be uniform. Typewritten lettering is not acceptable on figures. Computer-generated figures of good contrast and sharpness on bond paper are encouraged. Drawings should be prepared with undiluted india ink. Photographs should be glossy prints of the highest possible quality, and approximately the same size as they will appear in print. Letters, arrows, and symbols on photographs are best applied by pressure-sensitive materials. Color figures will be considered both as figure plates and for the frontispiece.

Copies of a more detailed set of instructions (Auk 105: 231) are available from the Editor.

Bioacousticians

Your workstation is here.

The DSP Sona-Graph™, model 5500 is a signal analysis workstation designed for the acquisition, processing and display of time-varying biological signals. The 5500 acquires, analyzes and displays signals in real-time with a continuous scrolling display, combining the features of a real-time spectrograph, a high-speed dual channel FFT and a computer-based data acquisition system.

It's a "wish list" workstation for the bioacoustician. The 5500 includes digital anti-aliasing filters, 16 bit A/D and 1.5 Mbytes of ROM storage for signal processing programs. Designed with you in mind, the 5500 provides up to 8 Mbytes of signal storage (one or two signals), on-screen cursors, extensive editing, high fidelity playback and computer interface capabilities.

- ✓ Two channel simultaneous display
- ✓ Real-time to 32 kHz
- ✓ Continuous thermal printing
- ✓ On-screen noise reduction feature
- ✓ High resolution color / grey scale display
- ✓ High fidelity playback and editing

To find out more about using the DSP Sona-Graph in your work, call **Robert McClurkin** at 800-289-5297 or write to the address listed below.
