(as established in 1989)

Sponsor (\$1,000), Patron (\$3,000), Benefactor (\$10,000)
Guarantor (\$25,000)

The names of major donors are listed in perpetuity in the rolls of the
American Ornithologists' Union.

The needs of the American Ornithologists' Union have changed since its
founding over 100 years ago, and they will continue to change. Thus the
A.O.U. strongly recommends that gifts to the Union be unrestricted.

New paperback edition

ONE MAN'S OWL

Bernd Heinrich

"Bernd Heinrich is a first-rate biologist, author, and observer. He writes well about natural history. This is his most personal book and covers three summers he shared with a Great-horned Owl named Bubo. The book documents the growth of the owl but, perhaps more importantly, reflects the curiosity, feelings, and thoughts of the author. The text is a way for Heinrich to share his experiences with the reader, and it works very well. . . . his writing . . . reflects a deep sensitivity to all the life that surrounds him."

POSTDOCTORAL FELLOWSHIP AT THE AMERICAN MUSEUM OF NATURAL HISTORY

The Frank M. Chapman Memorial Fund Committee welcomes applications for the Postdoctoral Fellowship Program in the areas of evolutionary and systematic ornithology. The Fellowship is usually for one year, but applicants may apply for two years, with a review of performance after the first year.

Deadline for applications is 15 January.

For application form and brochure, please write to:

Frank M. Chapman Memorial Fund

Department of Ornithology / American Museum of Natural History
Central Park West at 79th Street New York, New York 10024-5192, U.S.A.

INDEX TO VOLUME 3, 1992 69

The Neotropical Ornithological Society offers an exciting forum for exchange of information on the birds of this vast and diverse region. The Society's journal, ORNITOLOGIA NEOTROPICAL, is published twice a year in English. Papers cover the entire range of Neotropical ornithology by a variety of authors from throughout the hemisphere, including several of the best tropical ornithologists (Garrido, Willis, Remsen, Vuilleumier), as well as many up and coming new students of birds in the region.

THE MISSISSIPPI KITE

Eric G. Bolen and Dan Flores

Spend a year in the life of this familiar, graceful hawk. Known by many colorful folk names, the Mississippi Kite can be spotted in the countryside as well as open city spaces, from the Carolina coasts to the plains of the Southwest.

The Last Word in Ornithology.

Audubon to Xantus

The Lives of Those Commemorated
in North American Bird Names

Barbara Mearns and Richard Mearns

"Lively and entertaining, yet skillfully woven not only to show the contributions of each individual to 19th century American ornithology but also to indicate how those contributions fit together."

—FOR HABITAT

Every North American ornithologist is familiar with Audubon's Shearwater, Wilson's Phalarope, and Xantus' Murrelet. But few know about the people after whom these birds are named. Who were they? When did they live? How important was their contribution to the modern study of ornithology in the Americas? **Audubon to Xantus** explores the many people behind the names, allowing Barbara and Richard Mearns to continue the research they started in their popular book, **Biographies for Birdwatchers**.

Great Auk Islands

A Field Biologist in the Arctic

T.R. Birkhead

A Volume in the T & AD POYSER Series

A fine primer for research students and professionals, this book discusses the many facets of conducting field studies on seabirds and other species in various parts of the Arctic. Not only does it describe the biology of species living in one of the harshest environments on earth, but also describes a unique insight into the way scientists go about their business. Written in a straightforward and easy-to-read manner, the ups and downs that the field biologist has to enjoy and endure are engagingly described. The book also raises some challenging questions about human behavior.

The Vultures of Africa

Peter Mundy, Duncan
Butchart, John Ledger, and
Steven Piper

For the first time ever, **The Vultures of Africa** presents all 11 species in an authoritative account that ranks as one of the most important works on these fascinating yet threatened birds. Dr. Peter Mundy and his fellow authors answer every conceivable question on the biology and lifestyle of these birds in a text that is a refreshing departure from traditional bird monographs. The book is lively and contentious in style, but remains comprehensive in its approach. More than 130 photographs, and numerous maps and diagrams lend visual immediacy to this absorbing text.

SUPPLEMENTS

PROCEEDINGS OF THE ONE HUNDRED AND TENTH STATED MEETING 1AA-28AA

DATES OF ISSUES OF "THE AUK"

VOL. 110, No. 1—15 APRIL 1993

VOL. 110, No. 2—12 OCTOBER 1993

VOL. 110, No. 3—8 APRIL 1994

VOL. 110, No. 4—5 MAY 1994

A Quarterly Journal of Ornithology PUBLISHED BY THE AMERICAN ORNITHOLOGISTS' UNION

Editor: GARY D. SCHNELL, *The Auk*, Department of Zoology, Sutton Hall, 625 Elm Avenue, University of Oklahoma, Norman, Oklahoma 73019, USA. Telephone (405) 325-2784. FAX (405) 325-7504.

Managing Editor: NEIL J. BUCKLEY.

Associate Editor for Book Reviews: ROBERT M. ZINK, Bell Museum of Natural History, 100 Ecology Building, University of Minnesota, St. Paul, Minnesota 55108, USA (forward books for review directly to this address).

The Auk welcomes original reports on the biology of birds. Appropriate topics include the documentation, analysis, and interpretation of laboratory and field studies, theoretical or methodological developments, and reviews of information or ideas. Contributions written in English are encouraged from throughout the world.

Manuscript preparation.—Submit three copies of each manuscript, complete with tables, figure captions, and figures (retain original figures). **Double-space all written material** (including tables and figure legends) on standard-sized stationery sheets. Number pages through the Literature Cited. Do not hyphenate words at the ends of typewritten lines. Type tables separately from the text; type figure captions consecutively on a separate page. The manuscript should conform to general usage in recent issues (note stylistic changes incorporated in January 1992). The title page (numbered) should contain full title, and authors' names and addresses at the time of the research. The present address, if different, should be indicated as a footnote. The title page also includes running heads (<36 characters), and the name and mailing address of the individual to whom proofs should be sent.

An Abstract (<5% of paper length) should precede each regular article. It should summarize important premises, recapitulate findings, and give conclusions. Text citations should include the author and year (e.g. Darwin 1858, Wolter and Hunter 1968, Mayr et al. 1989); multiple citations should be arranged chronologically. Citations of specific page numbers, tables, or figures may be appropriate in certain situations (e.g. Diamond 1991:465–466, Zink et al. 1991:fig. 1, Dawson and Mannan 1991:table 6). Acknowledgments precede the Literature Cited. Title abbreviations of serial publications follow the International Serial Data System (ISDS) as indicated in *Serial Sources for the BIOSIS Previews Database* (1991, BIOSIS, Philadelphia), which is provided with *Biological Abstracts*. Scientific and English names of birds are given at first mention and follow the AOU's *Check-list of North American Birds* (1983) and its supplements. Measurements (and their designated abbreviations) are to be in SI units (see B. N. Taylor [Ed.], 1991, *The international system of units [SI]*, NIST Spec. Publ. 330, National Institute of Standards and Technology, U.S. Dep. Commerce, U.S. Government Printing Office, Washington, D.C.). In general, abbreviations of statistical terms conform to the fifth edition of the *CBE Style Manual* (1983, available from CBE, 9650 Rockville Pike, Bethesda, Maryland 20814). Use continental dating (e.g. 29 September 1990), the 24-hour clock (e.g. 0800 and 2035), and standard time (not daylight savings time).

Tables and figures should not duplicate material in the text or in each other. Each table requires a short heading; give particular attention to the form of table boxheads and do not include vertical rules. Illustrations should be prepared for one- or two-column width, keeping in mind the size of the *Auk*. The style of figures should be uniform. Helvetica or a similar sans serif style of type is recommended; typical typewriter lettering is unacceptable on figures.

After a paper has been accepted for publication, original figures and the original plus one copy of the manuscript (revised if necessary) are to be sent to the Editor. Illustrations in a large format are not desirable, since they are easily damaged or misplaced; if possible, original illustrations or high-quality reproductions should be no larger than standard-sized stationery sheets. On the back, each original illustration should have the figure number, author name, journal name, and an indication of the top of the figure. Drawings should be on good-quality paper and allow for about 20% reduction. Photographs should be glossy prints of high quality and approximately of the size they are to appear in print. Color figures will be considered as figure plates or a frontispiece.

Proofs, reprints, and charges.—Authors will receive page proofs for approval, along with the original typescript. Both must be returned within 48 h to the editorial office to avoid publication delays. A reprint order form will be sent with proofs; reprints are billed following the printer's current cost schedule. Because changes in proofs are expensive, authors should not expect to make major modifications in their work at this stage. Excessive alterations (i.e. more than about one line reset per two printed pages) in proofs will be charged to the author at the rate of \$3.00 per reset line. Authors should keep the Editor informed of address changes, so proofs will not be delayed. The AOU requests that authors, if possible, bear part or all of the cost of publishing their papers when grant, institutional, or personal funds are available for the purpose. Current costs per printed page are \$75; a minimum contribution of \$38 per page is recommended, but the AOU is pleased to receive any payment considered appropriate. Authors who do not have access to publication funds may request a waiver of this payment.
