

A Quarterly Journal of Ornithology  
PUBLISHED BY THE AMERICAN ORNITHOLOGISTS' UNION

*Editor:* GARY D. SCHNELL, *The Auk*, Department of Zoology, Sutton Hall, 625 Elm Avenue, University of Oklahoma, Norman, Oklahoma 73019, USA. Telephone (405) 325-2784. FAX (405) 325-7504. E-mail gschnell@uoknor.edu.

*Editor-elect:* THOMAS E. MARTIN (see Announcement).

*Managing Editor:* KENT E. THOMPSON AND TABATHA A. FRANKLIN.

*Associate Editor for Book Reviews:* ROBERT M. ZINK, Bell Museum of Natural History, 100 Ecology Building, University of Minnesota, St. Paul, Minnesota 55108, USA (forward books for review directly to this address).

*The Auk* welcomes original reports on the biology of birds. Appropriate topics include the documentation, analysis, and interpretation of laboratory and field studies, theoretical or methodological developments, and reviews of information or ideas. Contributions written in English are encouraged from throughout the world.

*Manuscript preparation.*—Submit three copies of each manuscript, complete with tables, figure captions, and figures (retain original figures). **Double-space all written material** (including tables and figure legends) on standard-sized stationery sheets. Number pages through the Literature Cited. Do not hyphenate words at the ends of typewritten lines. Type tables separately from the text; type figure captions consecutively on a separate page. The manuscript should conform to general usage in recent issues. The title page (numbered) should contain full title, and authors' names and addresses at the time of the research. The present address, if different, should be indicated as a footnote. The title page also includes running heads (<36 characters), and the name and mailing address of the individual to whom proofs should be sent.

An Abstract (<5% of paper length) should precede each regular article. It should summarize important premises, recapitulate findings, and give conclusions. Text citations should include the author and year (e.g. Darwin 1858, Wolter and Hunter 1968, Mayr et al. 1989); multiple citations should be arranged chronologically. Citations of specific page numbers, tables, or figures may be appropriate in certain situations (e.g. Diamond 1991:465-466, Zink et al. 1991:fig. 1, Dawson and Mannan 1991:table 6). Acknowledgments precede the Literature Cited. Title abbreviations of serial publications follow the International Serial Data System (ISDS) as indicated in *Serial Sources for the BIOSIS Previews Database* (1994, BIOSIS, Philadelphia), which is provided with *Biological Abstracts*. Scientific and English names of birds are given at first mention and follow the AOU's *Check-list of North American Birds* (1983) and its supplements. Measurements (and their designated abbreviations) are to be in SI units (see B. N. Taylor [Ed.], 1991, *The international system of units [SI]*. NIST Spec. Publ. 330, National Institute of Standards and Technology, U.S. Dep. Commerce, U.S. Government Printing Office, Washington, D.C.). In general, abbreviations of statistical terms conform to the sixth edition of *Scientific Style and Format: The CBE Manual for Authors, Editors, and Publishers* (1994, Cambridge University Press, New York). Use continental dating (e.g. 29 September 1990), the 24-hour clock (e.g. 0800 and 2035), and standard time (not daylight savings time).

Tables and figures should not duplicate material in the text or in each other. Each table requires a short heading; give particular attention to the form of table boxheads and do not include vertical rules. Illustrations should be prepared for one- or two-column width, keeping in mind the size of the *Auk*. The style of figures should be uniform. Helvetica or a similar sans serif style of type is recommended; typical typewriter lettering is unacceptable on figures.

After a paper has been accepted for publication, original figures and the original plus one copy of the manuscript (revised if necessary) are to be sent to the Editor. Illustrations in a large format are not desirable, since they are easily damaged or misplaced; if possible, original illustrations or high-quality reproductions should be no larger than standard-sized stationery sheets. On the back, each original illustration should have the figure number, author name, journal name, and an indication of the top of the figure. Drawings should be on good-quality paper and allow for about 20% reduction. Photographs should be glossy prints of high quality and approximately of the size they are to appear in print. Color figures will be considered as figure plates or a frontispiece.

*Proofs, reprints, and charges.*—Authors will receive page proofs for approval, along with the original typescript. Both must be returned within 48 h to the editorial office to avoid publication delays. A reprint order form will be sent with proofs; reprints are billed following the printer's current cost schedule. Because changes in proofs are expensive, authors should not expect to make major modifications in their work at this stage. Excessive alterations (i.e. more than about one line reset per two printed pages) in proofs will be charged to the author at the rate of \$3.00 per reset line. Authors should keep the Editor informed of address changes, so proofs will not be delayed. The AOU requests that authors, if possible, bear part or all of the cost of publishing their papers when grant, institutional, or personal funds are available for the purpose. Current costs per printed page are \$75; a minimum contribution of \$38 per page is recommended, but the AOU is pleased to receive any payment considered appropriate. Authors who do not have access to publication funds may request a waiver of this payment.

# Contents (continued)

THE DEBATE OVER SPECIES CONCEPTS AND ITS IMPLICATIONS FOR ORNITHOLOGY. <i>Robert M. Zink and Mary C. McKittrick</i> .....	701
SUCCESSIONAL CHANGES AND HABITAT SELECTION IN HAYFIELD BIRD COMMUNITIES. <i>Eric K. Bolinger</i> .....	720
IMMIGRATION IN A SMALL POPULATION OF SNOW GEESE. <i>Stephen R. Johnson</i> .....	731
EFFECTS OF HANDICAPPING ON FEMALE CONDITION AND REPRODUCTION IN TREE SWALLOWS ( <i>TACHYCINETA BICOLOR</i> ). <i>David W. Winkler and Paul E. Allen</i> .....	737
GENETIC AND ENVIRONMENTAL FACTORS INFLUENCING CLUTCH SIZE IN EQUATORIAL AND TEMPERATE ZONE STONECHATS ( <i>SAXICOLA TORQUATA AXILLARIS</i> AND <i>S. T. RUBICOLA</i> ): AN EXPERIMENTAL STUDY. <i>Eberhard Gwinner, Sibylle König, and Chris S. Haley</i> .....	748
IN MEMORIAM: FRED J. PIERCE, 1902-1992. <i>Peter C. Petersen</i> .....	756
IN MEMORIAM: JOHN FARRAND, JR., 1937-1994. <i>François Vuilleumier</i> .....	756
<b>SHORT COMMUNICATIONS AND COMMENTARIES</b>	
Reliability of the Breeding Bird Survey: Effects of restricting surveys to roads. <i>Jonathan Bart, Matthias Hofschien, and Bruce G. Peterjohn</i> .....	758
Avian premaxilla and tarsometatarsus from the uppermost Cretaceous of Montana. <i>Andrzej Elzanowski and Michael K. Brett-Surman</i> .....	762
Forest fragmentation and nest predation: Are experiments with Japanese Quail eggs misleading? <i>David G. Haskell</i> .....	767
A Prairie Warbler with a conspecific and heterospecific song repertoire. <i>Paul R. Martin, James R. Fotheringham, and Raleigh J. Robertson</i> .....	770
Unusual metabolic shifts in fasting hummingbirds. <i>José Guilherme Chaui-Berlinck and José Eduardo P. W. Bicudo</i> .....	774
Consumption and caching of food in the Northwestern Crow ( <i>Corvus caurinus</i> ). <i>Tanya Saunders and Ron Ydenberg</i> .....	778
A saline-flushing technique for determining the diet of seed-eating birds. <i>James P. Gionfriddo, Louis B. Best, and Bret J. Giesler</i> .....	780
Intersexual comparison of plasma osmolytes, kidney size, and glomerular number and size in Pekin ducks ( <i>Anas platyrhynchos</i> ). <i>Maryanne R. Hughes, Eldon J. Braun, and Darin C. Bennett</i> .....	782
Method for sexing fledglings in Cory's Shearwaters and comments on sex-ratio variation. <i>Vincent Bretagnolle and Jean-Claude Thibault</i> .....	785
Responses of Snow Geese to artificially induced hatching asynchrony and increased clutch size. <i>Gregory J. Robertson, Megan A. Owen, and R. F. Rockwell</i> .....	790
Status and habitat area requirements of the Veery in Illinois. <i>James R. Herkert</i> .....	794
First nesting record of the Tamarugo Conebill ( <i>Conirostrum tamarugense</i> ). <i>Cristián F. Estades and María V. López-Calleja</i> .....	797
Body pterylosis of woodcreepers and ovenbirds (Dendrocolaptidae and Furnariidae). <i>Mary Heimerdinger Clench</i> .....	800
Conservation commentary: Ornithology and the National Biological Survey. <i>Stanley E. Senner and Susan R. Drennan</i> .....	804
BOOK REVIEWS. <i>Edited by Robert M. Zink</i> .....	807
ANNOUNCEMENT .....	818
FORTIETH SUPPLEMENT TO THE AMERICAN ORNITHOLOGISTS' UNION CHECK-LIST OF NORTH AMERICAN BIRDS .....	819
