The Wood Duck and the Mandarin

The Northern Wood Ducks

Lawton L. Shurtleff & Christopher Savage

"The two authors aspire to achieve the preservation of these two species in the wilds for the joy of future generations. A wonderful collection of cultural and biological material."

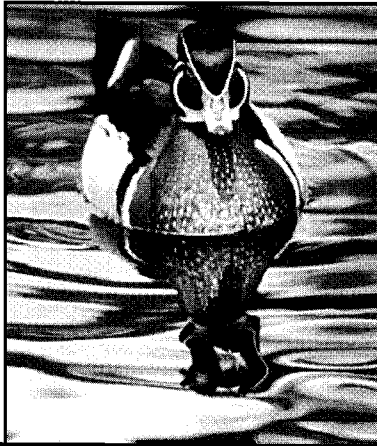

—Sir Peter Scott, author, artist & conservationist

"Filled with colorful images and is beautifully written."

—Roger Tory Peterson,
author, artist &
photographer

This is a story of conservation told through the natural histories of two of the world's most fascinating birds.

ECOLOGY AND EVOLUTION OF ACOUSTIC COMMUNICATION IN BIRDS

Edited by Donald E. Kroodsma
and Edward H. Miller

"Kroodsma and Miller have succeeded at the seemingly impossible task of bringing together and making sense of the explosion of research findings during the past fifteen years on the ecology and evolution of birdsong. The volume focuses on field work and the study of within—and between—species variation and its significance. The result is a rich yield of new insights that no researcher on this subject can afford to ignore. This outstanding book will serve as a benchmark for a new generation of researchers as the study of vocal communication in birds comes of age."

—PETER MARLER, University of California, Davis

Instructions to Contributors

The Auk publishes original reports on the biology of birds. Appropriate topics include documentation, analysis, and interpretation of laboratory and field studies, theoretical or methodological developments, and reviews of information or ideas. Authors are encouraged to write papers from the perspective of general concepts and theories, and to consider the relevance of their findings to taxa in addition to birds. *The Auk* strives to publish a color frontispiece with each lead article; authors are encouraged to submit suitable color illustrations. Contributions are welcome from throughout the world but must be written in English. Submit five copies of each manuscript complete with tables, figure legends, and figures (retain original figures until notified) to the Editor. Include a copy of the manuscript on a 3.5-inch diskette (WordPerfect preferred, but identify the software). Double-space all written material (including tables and figure legends) on standardized stationery. Number pages through the figure legends. Submit tables separately from the text; type figure legends consecutively on a separate sheet. Manuscripts should conform to general usage in the most recent issue of the journal. The title page should contain: (1) full title; (2) authors' names and addresses; (3) left and right running heads (<36 characters each); and (4) name, mailing address, and e-mail address of author to whom correspondence should be sent. Detailed instructions to contributors are available in *Auk* 113(3): 731-733; copies may be obtained from the Editor. Paying close attention to these instructions will hasten the processing of your manuscript and gratify the editorial staff.
