

PROF. F. E. L. BEAL

Few eastern orn thologists are better known to Californians than Prof. Beal, who has spent much time with us, studying in the field the relations of our common birds to agriculture and horticulture. Prof. Beal's name has long held foremost rank among the economic ornithologists of the country, and it is safe to say his papers on economic ornithology have been more potent in influencing farmers and fruit growers, than a legion of state laws. Under the auspices of the Biological Survey of the U. S. Department of Agriculture, with a corps of able assistants, he is rapidly and successfully impressing upon the minds of our practical class the relation of birds to the matter of dollars and cents.

We are much indebted to Mr. W. Otto Emerson for the opportunity of presenting this excellent portrait.

## The Status of the Southern California Cactus Wren

BY HARRY S. SWARTH

N a recent review of the cactus wrens of the United States Dr. Means describes a new desert race under the name of Heleodytes brunneicapillus anthonyi and ascribes the birds of the coast region of southern California to the subspecies bryanti. Believing him to be mistaken in both statements I have been to some pains to bring together a series of cactus wrens from the regions inhabited by the two supposed varieties; and what with those in my own collection, together with specimens loaned me by different members of the Cooper Club I have had at my disposal, in all, forty-eight skins, representing the following localities: 22 from southern California (San Fernando, Pasadena, San Bernardino, and San Gorgonoi
