THE DISTRIBUTION OF THE BIRDS OF CALIFORNIA

Large Octavo, 600 Pages (estimated), with over 50 maps

and a colored frontispiece by Allan Brooks

By JOSEPH GRINNELL and ALDEN H. MILLER

Published by the Cooper Ornithological Club

as Pacific Coast Avifauna No. 27

An up-to-date account of the distribution, seasonal occurrence and habitat of the birds of California, with guides to the most significant writings concerning each species. As a complete list of all birds known to occur in the State, it deals with 640 species and subspecies and presents the conclusions of these western ornithologists on the classification and nomenclature of Pacific coast forms.

This work is indispensable to every serious student of western birds and is an essential reference book for all school and public libraries.

THE AUTHORS—Joseph Grinnell, late Director of the Museum of Vertebrate Zoology of the University of California; Alden H. Miller, his successor at the same museum. Grinnell had written half the manuscript of this work prior to 1939. The remainder was written and the whole revised by Miller.

Owing to increased costs and restriction on all printing we will be compelled to set a price of \$6.00 per copy, unbound; \$7.00 for copy bound in buckram.

This is the one scale of prices to everyone. We will appreciate your check with order, where convenient. The book will be sent postpaid anywhere in the United States, but for all sales in California please add 2½% sales tax.
