FOR SALE—Books on birds and other natural history subjects; catalogue sent on request.—W. R. HECHT, *3965a Shenandoah, St. Louis 10, Mo.*

MUSIC IN NATURE

By LOYE MILLER

Four 12-inch, vinylite (non-breakable) phonograph records with over 50 bird songs and animal sounds.

This popular talk by Loye Miller is again available. Music in Nature is an informal discussion of the five elements of music—time, tone, tune, timbre, touch—in relationship to bird songs and animal sounds. These sounds are reproduced by Professor Miller's own vocal and whistled imitations. Highlights are the four calls of the California Quail, the songs and cries of the goldfinch, wolf, horned owl, tree-toad, and meadowlark, and the amazing combination of tongue flutter, whistle, and grunt used to reproduce the sound of the Sandhill Crane. Fifty of the bird songs and animal sounds are applicable in any state of the Union. This material is ideally suited for all grades of classroom instruction and is being used by many school districts throughout the country.

Loye Miller has made field studies of natural sounds for more than fifty years. As Professor of Biology in the University of California at Los Angeles, he has long been noted as a scientist and teacher and for his leadership in nature study groups and for his talks about birds and animals.

The University of California has given The Cooper Ornithological Society the right to sell Music in Nature as a contribution to Ornithology.

The four discs, seven sides recorded, \$7.50 plus 3% state sales tax in California.
