ORNITHOLOGISTS—Do you know why wearing a hat may help you see birds more clearly through binoculars? Read our new article: "Getting More from Your Binocular," in the Audubon Magazine, March-April, 1957. Also, send for reprints of our earlier Audubon Magazine articles: "Know Your Binoculars"—how to choose the "right" model for your personal requirements, check it for the claims made for it, and use it to best advantage, a 12-page booklet, 10¢ (no charge to C.O.S. members); and "How to Check Alignment," free. If your binocular does not give clear and restful vision, send it to us; we clean and align to U. S. Government tolerances in one week. If you need a new binocular, send for our price list of American, German, and Japanese binoculars, 3 grades with quality comparison, including 6 models modified in our shop especially for bird study. Every glass, irrespective of price, is covered by our one-year free-service guarantee. We ship on 30 days' trial; send for details. If you have a binocular problem, let us help you solve it. We answer questions personally.—THE REICHERTS, Mirakel Optical Co., Mount Vernon 15, N.Y.
