SPECIAL ANNOUNCEMENT

Late in 1959 the Cooper Ornithological Society will publish Part II of the monumental work, *Life Histories of Central American Birds*, by Dr. Alexander F. Skutch. This book will run approximately 600 pages and is brilliantly illustrated by the noted artist, Don R. Eckelberry.

It has been our experience that the announcement of each new book produces a sizeable number of orders for our other publications. We think it is important to point out to bird students, libraries, and collectors of fine bird books the importance of sending us their orders for Part I of *Life Histories of Central American Birds* while copies are still available. This book contains life histories of 40 species of birds of Central America belonging to the higher families of song birds—the finches, tanagers, troupials, wood warblers, and honey creepers.

Part I consists of 448 pages and it is illustrated by Don R. Eckelberry. A group of four tanagers is shown in color and all other species are represented by line drawings. Thirty-two photographs show nests and habitats of tropical America.

Pacific Coast Avifauna Number 31 was published in 1954. It is available at the following prices:

Bound with paper covers.....	\$9.00 per copy
Bound with strong buckram.....	\$10.00 per copy

Sent postpaid anywhere in the U.S.A.

(4% sales tax added for sales in California)
