MRS. MARGARET W. DIVIZIA, Supervisor in Charge, Audio-Visual Section, Los Angeles City School Districts, states, after listening to the new MUSIC IN NATURE record, by Dr. Loye Miller, "Dr. Miller's reputation was built on an extensive scientific background, his creative approach to his subject, and skill as a teacher who was able to interest, stimulate, and inspire students. Through this record, MUSIC IN NATURE, I feel that teachers and classes may meet this unusual man and participate in one of his dramatic presentations which weaves facts, ideas, and a living philosophy into an intriguing lesson."

## MUSIC IN NATURE

By Loye Miller

Improved reproduction on one 12-inch nonbreakable microgroove vinylite long-playing phonograph record with over 50 bird songs and animal sounds.

This popular talk by Loye Miller is again available. Music in Nature is an informal discussion of the five elements of music—time, tone, tune, timbre, touch—in relationship to bird songs and animal sounds. These sounds are reproduced by Professor Miller's own vocal and whistled imitations. Highlights are the four calls of the California Quail, the songs and cries of the goldfinch, wolf, horned owl, tree-toad, and meadowlark, and the amazing combination of tongue flutter, whistle, and grunt used to reproduce the sound of the Sandhill Crane. Fifty of the bird songs and animal sounds are applicable in any state of the Union. Professor Miller uses these sounds to present his philosophy that all listeners can grow to appreciate their environment more fully. This material is ideally suited for nearly all grades of classroom instruction and is being used by many school districts throughout the country.

Loye Miller has made field studies of natural sounds for more than fifty years. As Professor of Biology in the University of California at Los Angeles, he has long been noted as a scientist and teacher and for his talks about birds and animals.

The University of California has given The Cooper Ornithological Society the right to sell Music in Nature as a contribution to Ornithology.

This 12-inch pressing, including attractive sleeve, only \$3.95. This includes delivery cost and State Sales Tax in California.
