

THE CONDOR

Volume 72

January, 1970

Number 1

JOURNAL OF THE COOPER ORNITHOLOGICAL SOCIETY

MEMBERSHIP DUES

Regular members, \$8.00 per year, of which \$6.00 are for a year's subscription to THE CONDOR; student members, \$5.00 per year; sustaining members, \$10.00 per year; contributing members, \$25.00 per year. All classes of membership receive THE CONDOR.

The life membership fee is \$250.00 and the patron's membership fee is \$1000.00. No additional dues are required. The money from both life and patron's membership fees is invested and only the earning therefrom is used to help defray expenses for the society's publications.

Send payment for dues, notices of change of address, and requests for information concerning memberships to *Jane R. Durham, Treasurer, 968 Cragmont Avenue, Berkeley, California 94708.*

SUBSCRIPTION RATES

Subscription price to institutions and non-members, \$10.00 per volume, payable in advance. Single copies, \$2.75 each. Subscription orders should be sent to the Treasurer, address above. Orders for single copies should be sent to the Assistant Treasurer, James G. Miller, Department of Zoology, University of California, Los Angeles, California 90024.

INFORMATION FOR CONTRIBUTORS

The Condor will publish research reports and short communications that contain new information on any subject relevant to the biology of wild species of birds. The journal will also publish occasional review articles. Submit manuscripts for publication to the Editor.

Manuscripts. Submit the original and one copy, typewritten double-spaced (including tables, legends, and literature cited section) on one side of standard ($8\frac{1}{2} \times 11$ inch), good quality bond paper, with at least one-inch margins. Do not use erasable, light weight, or mimeo bond. The author's name should be placed in the upper right-hand corner of each page. Number pages through the list of references; include tables and legends for figures on separate unnumbered pages. Avoid footnotes. Provide a concise, definitive title and, where necessary, subheadings within the text (no more than three levels). A factual summary is recommended for longer papers. Tables (unruled) should be kept at a minimum and should not duplicate material in either the text or graphs.

Scientific names should always be given at first mention of a species and those for avian species should usually follow the usage of the A.O.U. Check-list of North American Birds (Fifth ed., 1957) or an appropriate equivalent. When both the common name and the scientific name of a bird species are given as a paragraph heading (e.g., in regional lists of species) the common name should be given first. The use of metric units is generally required in all measurements of birds and their physical environment.

Abbreviations of mensural units should conform with the Council of Biological Editors' Style Manual for Biological Journals (Second ed., American Institute Biological Sciences, Washington, D. C., 1964) except in the case of thermometric units, where the degree sign is to be retained. Clock time is to be designated in the 24-hour system and written as 08:00 or 17:25 (not 0800 hours, or 1725 hours). Use the military system of calendar notation (e.g., 1 January 1970). In many other matters of form the Government Printing Office Style Manual, in addition to the A.I.B.S. style manual, will be helpful.

Illustrations. All illustrative material should be arranged in the form of *figures*, each with an arabic number. A duplicate or reasonably accurate copy of each figure should be submitted for use of reviewers.

The vast majority of illustrations should be on $8\frac{1}{2} \times 11$ inch paper, including labels of coordinates. The general rule is to make drawings about twice the size they will appear in print. That is, one-column illustrations ($2\frac{1}{4}$ inches) should be 5-6 inches wide, and two-column ($5\frac{1}{4}$ inches) figures should be no more than 11 inches wide. All but the most complex graphs should be planned for a single column. If the originals are larger than $8\frac{1}{2} \times 11$ inches, they should *not* be sent to the editor, but should be submitted as photostats or glossy photographs of MS page size. Almost all copies by office duplicating machines are not acceptable, but engravings can be made from photocopies if of professional quality.

Typewriter lettering is not acceptable. We suggest mechanical lettering, pressure transfer letters, or good hand lettering. Avoid bold, heavy, and ornate letters. When reduced for printing, lettering should be little, if any, higher or grossly darker than the text type; nor should the lettering be much smaller than the smallest text type in the journal. The size of the lettering is simple to plan with 50 per cent reduction of the illustration. When possible, all the drawings for one paper should have the same reduction.

Coordinate paper (light blue grids only), and any smooth or "plate" finish drafting paper is suitable. Tracing paper and cloth are not recommended, although if submitted they should be mounted on white cardboard. Only carbon drafting or India ink should be used.

Photographs should be glossy prints, no larger than $8\frac{1}{2} \times 11$ inches, and of good contrast and sharpness. Write the author's name and figure number lightly on the back in soft pencil. Never use paper clips on photographs. Do not fold photographs, or mark the surface of the print to indicate cropping. If a given figure contains separate portions, these should be composed by the author and identified by letters. Composite photographs should be mounted touching one another and be squared on all sides. Letters and arrows are best applied by pressure sensitive materials. Avoid large and heavy letters.

THE CONDOR

JOURNAL OF THE COOPER ORNITHOLOGICAL SOCIETY

Volume 72, Number 1

Issued 31 January 1970

Editor: RALPH J. RAITT
Department of Biology
New Mexico State University
Las Cruces, New Mexico 88001

CONTENTS

- 1 The Impact of Seasonal Flowering on the Biology of Some Tropical Hummingbirds
LARRY L. WOLF
- 15 Social Behavior of Nesting Brewer's Blackbirds
HENRY S. HORN
- 24 Song in a Population of Black-throated Sparrows
DONALD B. HECKENLIVELY
- 37 An Intergeneric Hybrid Flycatcher (*Tyrannus* × *Muscivora*)
L. IRBY DAVIS and FRED S. WEBSTER, JR.
- 43 A Comparative Electrophoretic Study of Avian Plasma Proteins
CHARLES G. SIBLEY and HERBERT T. HENDRICKSON
- 50 The Metabolic Significance of Differential Absorption of Radiant Energy by Black and White Birds
FRANK HEPPNER
- 60 Energy Requirements for Existence in Relation to Size of Bird
S. CHARLES KENDEIGH
- 66 Hyperphagia, Polydipsia, and Other Effects of Hypothalamic Lesions in the White-throated Sparrow, *Zonotrichia albicollis*
WAYNE J. KUENZEL and CARL W. HELMS
- 76 The Biology of an Endangered Species, the Dark-rumped Petrel (*Pterodroma phaeopygia*), in the Galápagos Islands
MICHAEL P. HARRIS
- 85 A Summary of Intergeneric New World Quail Hybrids, and a New Intergeneric Hybrid Combination
PAUL A. JOHNSGARD
- 89 Notes on the Cayenne Tern in Uruguay
RODOLFO ESCALANTE
- 95 A Systematic Revision of *Geothlypis speciosa*, the Black-pollled Yellowthroat
ROBERT W. DICKERMAN

SHORT COMMUNICATIONS

- 99 Ineffectiveness of Pineal Lesions on the Testis Cycle of a Finch
W. M. HAMNER and R. J. BARFIELD
- 101 Photorefractoriness in Pinealectomized Harris' Sparrows
RICHARD S. DONHAM and FRED E. WILSON
- 102 Birds of the Chignik River Drainage, Alaska
DAVID W. NARVER
- 105 New and Interesting Records from the Chiriquí Highlands of Panamá
CHARLES F. LECK and STEVEN HILTY
- 106 Notes on Brazilian Cracidae
HELMUT SICK
- 108 The Great Swallow-tailed Swift (*Panyptila sanctihieronymi*) from the State of Guerrero, México
KEITH A. ARNOLD and TERRY C. MAXWELL

(Continued on next page)

- 108 Common Teal and Tufted Duck in Northwestern California
STANLEY W. HARRIS and R. H. GERSTENBERG
- 109 Bird Records from Southern Nevada
RICHARD C. BANKS and CHARLES G. HANSEN
- 110 First Record of the Black Brant (*Branta nigricans*) for New Mexico
JAMES L. SANDS
- 110 Birds Observed During a Cruise in the Ice-covered Bering Sea in March 1968
LAURENCE IRVING, C. PETER McROY and JOHN J. BURNS
- 112 Aerial Eagle Count in Colorado
JAMES H. ENDERSON, FRANK A. COLLEY, and JOHN STEVENSON
- 112 A California Specimen of the Bar-tailed Godwit
R. H. GERSTENBERG and STANLEY W. HARRIS
- 113 Observations on Food, Nesting, and Winter Populations of Large North American Falcons
CLAYTON M. WHITE and DAVID G. ROSENEAU
- 115 House Finches (*Carpodacus mexicanus*) in Montana
RALPH L. HAND
- 116 A Method of Estimating Carcass Fat and Fat-free Weights in Migrant Birds from Water
Content of Specimens
GEORGE I. CHILD and SHIRLEY G. MARSHALL
- 119 A Breeding Record for the Gray-hooded Gull, *Larus cirrocephalus*, on the Peruvian Coast
HUMBERTO TOVAR S. and N. PHILIP ASHMOLE
- 122 Winter Observations of the Short-tailed Albatross in the Western Pacific Ocean
JOHN P. TRAMONTANO
- 123 News and Notes
- 124 The Bulletin Board
