UNIVERSITY OF IDAHO

JOURNAL OF THE COOPER ORNITHOLOGICAL SOCIETY

MEMBERSHIP DUES

Regular members, \$8.00 per year, of which \$6.00 are for a year's subscription to THE CONDOR; student members, \$5.00 per year; sustaining members, \$10.00 per year; contributing members, \$25.00 per year. All classes of membership receive THE CONDOR.

The life membership fee is \$250.00 and the patron's membership fee is \$1000.00. No additional dues are required. The money from both life and patron's membership fees is invested and only the earning therefrom is used to help defray expenses for the society's publications.

Send payment for dues, notices of change of address, and requests for information concerning memberships to *Jane R. Durham, Treasurer, 968 Cragmont Avenue, Berkeley, California 94708.*

SUBSCRIPTION RATES

Subscription price to institutions and non-members, \$10.00 per volume, payable in advance. Single copies, \$2.75 each. Subscription orders should be sent to the Treasurer, address above. Orders for single copies should be sent to the Assistant Treasurer, James G. Miller, Department of Zoology, University of California, Los Angeles, California 90024.

INFORMATION FOR CONTRIBUTORS

The Condor will publish research reports and short communications that contain new information on any subject relevant to the biology of wild species of birds. The journal will also publish occasional review articles. Submit manuscripts for publication to the Editor.

Manuscripts. Submit the original and one copy, typewritten double-spaced (including tables, legends, and literature cited section) on one side of standard ($8\frac{1}{2} \times 11$ inch), good quality bond paper, with at least one-inch margins. Do not use erasable, light weight, or mimeo bond. The author's name should be placed in the upper right-hand corner of each page. Number pages through the list of references; include tables and legends for figures on separate unnumbered pages. Avoid footnotes. Provide a concise, definitive title and, where necessary, subheadings within the text (no more than three levels). A factual summary is recommended for longer papers. Tables (unruled) should be kept at a minimum and should not duplicate material in either the text or graphs.

Scientific names should always be given at first mention of a species and those for avian species should usually follow the usage of the A.O.U. Check-list of North American Birds (Fifth ed., 1957) or an appropriate equivalent. When both the common name and the scientific name of a bird species are given as a paragraph heading (e.g., in regional lists of species) the common name should be given first. The use of metric units is generally required in all measurements of birds and their physical environment.

Abbreviations of mensural units should conform with the Council of Biological Editors' Style Manual for Biological Journals (Second ed., American Institute Biological Sciences, Washington, D. C., 1964) except in the case of thermometric units, where the degree sign is to be retained. Clock time is to be designated in the 24-hour system and written as 08:00 or 17:25 (not 0800 hours, or 1725 hours). Use the military system of calendar notation (e.g., 1 January 1970). In many other matters of form the Government Printing Office Style Manual, in addition to the A.I.B.S. style manual, will be helpful.

Illustrations. All illustrative material should be arranged in the form of *figures*, each with an arabic number. A duplicate or reasonably accurate copy of each figure should be submitted for use of reviewers.

The vast majority of illustrations should be on $8\frac{1}{2} \times 11$ inch paper, including labels of coordinates. The general rule is to make drawings about twice the size they will appear in print. That is, one-column illustrations ($2\frac{3}{4}$ inches) should be 5-6 inches wide, and two-column ($5\frac{3}{4}$ inches) figures should be no more than 11 inches wide. All but the most complex graphs should be planned for a single column. If the originals are larger than $8\frac{1}{2} \times 11$ inches, they should *not* be sent to the editor, but should be submitted as photostats or glossy photographs of MS page size. Almost all copies by office duplicating machines are not acceptable, but engravings can be made from photocopies if of professional quality.

Typewriter lettering is not acceptable. We suggest mechanical lettering, pressure transfer letters, or good hand lettering. Avoid bold, heavy, and ornate letters. When reduced for printing, lettering should be little, if any, higher or grossly darker than the text type; nor should the lettering be much smaller than the smallest text type in the journal. The size of the lettering is simple to plan with 50 per cent reduction of the illustration. When possible, all the drawings for one paper should have the same reduction.

Coordinate paper (light blue grids only), and any smooth or "plate" finish drafting paper is suitable. Tracing paper and cloth are not recommended, although if submitted they should be mounted on white cardboard. Only carbon drafting or india ink should be used.

Photographs should be glossy prints, no larger than $8\frac{1}{2} \times 11$ inches, and of good contrast and sharpness. Write the author's name and figure number lightly on the back in soft pencil. Never use paper clips on photographs. Do not fold photographs, or mark the surface of the print to indicate cropping. If a given figure contains separate portions, these should be composed by the author and identified by letters. Composite photographs should be mounted touching one another and be squared on all sides. Letters and arrows are best applied by pressure sensitive materials. Avoid large and heavy letters.

THE CONDOR

JOURNAL OF THE COOPER ORNITHOLOGICAL SOCIETY

Volume 72, Number 2

Issued 30 April 1970

Editor: RALPH J. RAITT
Department of Biology
New Mexico State University
Las Cruces, New Mexico 88001

CONTENTS

- 125 Thermoregulation in the Red-breasted Nuthatch (*Sitta canadensis*)
JOHN N. MUGAAS and JAMES R. TEMPLETON
- 133 Breeding Biology of Western Gulls (*Larus occidentalis*) on San Nicolas Island, California, 1968
RALPH W. SCHREIBER
- 141 Temperature Regulation in the Speckled Mousebird, *Colinus striatus*
GEORGE A. BARTHOLOMEW and CHARLES H. TROST
- 147 Mid-Pleistocene Birds from Western Nebraska, Including a New Species of Sheldgoose
LESTER L. SHORT, JR.
- 153 The Bioenergetics of Captive Blue-winged Teal Under Controlled and Outdoor Conditions
RAY B. OWEN, JR.
- 164 Relative Kidney Size in Nonpasserine Birds with Functional Salt Glands
MARYANNE ROBINSON HUGHES
- 169 Foraging Behavior of Some Winter Birds of Deciduous Woods
MARY F. WILLSON
- 175 Weights, Body Composition, and Caloric Value of Postjuvencal Molting European Tree Sparrows (*Passer montanus*)
ANDRZEJ MYRCHA and JAN PINOWSKI
- 182 Breeding Bird Populations of Burned and Unburned Conifer Forest in the Sierra Nevada
CARL E. BOCK and JAMES F. LYNCH
- 190 Light Responses of Thyroidectomized Common Weaver Birds, *Ploceus philippinus*
J. P. THAPLIYAL and K. BAGESHWAR
- 196 Notes on the Food Habits and Food Defense of the Acorn Woodpecker
MICHAEL H. MACROBERTS
- 205 Seasonal Changes in Thymus Weights in Ring-necked Pheasants
WILLIAM L. ANDERSON
- 209 A New Hybrid Hummingbird, *Archilochus alexandri* × *Selasphorus sasin*
JAMES F. LYNCH and PETER L. AMES
- 213 Vocalizations of the Long-billed Curlew
DENNIS M. FORSYTHE
- 225 Temperature Changes in Chimney Swifts (*Chaetura pelagica*) at Lowered Environmental Temperatures
JED J. RAMSEY

SHORT COMMUNICATIONS

- 230 Status of the Summer Tanager on the Pacific Slope
AMADEO M. REA
- 233 Roosting Behavior of Three Species of Woodcreepers (Dendrocolaptidae) in Brazil
YOSHIKA ONIKI

(Continued on next page)

- 234 Interspecific Territoriality of Migrant Calliope and Resident Broad-tailed Hummingbirds
GEORGE T. AUSTIN
- 234 Feeding Habits of the Dipper in Southwestern Washington
RUDOLPH N. THUT
- 235 Nidification in the Channel-billed Toucan (*Ramphastos vitellinus*) in Trinidad, West Indies
ALAN LILL
- 236 Ingestion of Stones by Goatsuckers (Caprimulgidae)
MARION ANNE JENKINSON and ROBERT M. MENGEL
- 238 Parental Feeding in a Male Great-tailed Grackle
ROBERT K. SELANDER
- 238 The Eggs and Young of the Palila, an Endangered Species
ANDREW J. BERGER
- 240 The White-eye as an Interspecific Feeding Helper
C. ROBERT EDDINGER
- 241 The Feeding Pattern of Sapsuckers on Ponderosa Pine in Northeastern California
WILLIAM W. OLIVER
- 242 Recent Observations at the Base of the Alaska Peninsula
DANIEL D. GIBSON
- 243 Specimen Records for South Dakota Birds
BRUCE K. HARRIS
- 244 An Instance of a Captive Turkey Vulture Killing Prey
BEN GLADING and CHARLOTTE H. GLADING
- 245 A Marsh Hawk Roost in Texas
CARROLL D. LITTLEFIELD
- 245 "Foot-trembling" Feeding Behavior by a Killdeer
SUSAN M. SMITH
- 246 Chestnut-sided Warbler in Washington
DAVID B. MARSHALL
- 246 A Note on the Stomach Contents of Two Whooping Cranes
FRANCIS M. UHLER and LOUIS N. LOCKE
- 246 Notes on the Royal Tern in Surinam
F. HAVERSCHMIDT
- 247 On the Fitting of Equations Relating Avian Standard Metabolism to Body Weight
JERROLD H. ZAR
- 247 Nesting of King Vulture and Black Hawk-Eagle in Panamá
