

## THE BULLETIN BOARD

WANTED—Skin Cases. Please write condition and price expected.—Bleitz Wildlife Foundation, 5334 Hollywood Blvd., Hollywood, California 90027.

WANTED—In my study on the systematics of the five subspecies of White-tailed Ptarmigan, I have examined over 600 specimens in the major museums. I have found that populations from Colorado, Alberta and mainland British Columbia are well represented in museums. However, populations occurring in Alaska, Yukon and adjacent Mackenzie District, N.W.T., Montana, Idaho, Washington, Wyoming, New Mexico, and Vancouver Island are under-represented in museum collections. I would be grateful to learn of specimens from these areas deposited in museums or collections that I have not previously contacted. Please submit promptly.—Dr. Clait E.

Braun, Game Research Center, P. O. Box 567, Fort Collins, Colorado 80521.

WANTED—Information with regard to body and feather weights of phasianid game birds, especially California quail and pheasant. Need for comparative and geographic analysis.—Carl Phillips, Dept. of Zoology, Univ. British Columbia, Vancouver 8, B. C., Canada.

WANTED—Blanchard, B. D. The White-crowned Sparrows (*Zonotrichia leucophrys*) of the Pacific Seaboard: Environment and Annual Cycle. Univ. Calif. Publ. Zool., 1941, 46:1-178.—Lewis Petrinovich, Dept. of Psychology, Univ. of California, Riverside, Calif. 92502.
