## STUDIES IN AVIAN BIOLOGY

The Cooper Ornithological Society announces the initiation of a new series of ornithological publications. Studies in Avian Biology, as the successor to Pacific Coast Avifauna, will continue the proud tradition established by that journal as an outlet for important papers too long for inclusion in The Condor.

The first issue will be

### Status and Distribution of Alaska Birds

By

# BRINA KESSEL and DANIEL D. GIBSON University of Alaska Museum

- Brings up to date the knowledge of distribution and occurrence of birds in Alaska, through detailed accounts for over 200 of the 331 species known to have occurred in this ornithologically exciting state.
- Based on published and unpublished records of the authors and many collaborators, accumulated since Gabrielson's and Lincoln's The Birds of Alaska, 1959.

#### ORDERING INFORMATION

Price: \$7.00, including postage and handling if ordered prior to April 1, 1979; \$8.00 plus postage and handling if ordered after that date.

Send orders to James G. Miller, Assistant Treasurer, Cooper Ornithological Society, c/o Department of Biology, University of California, Los Angeles 90024. Make checks to Cooper Ornithological Society.

#### INFORMATION FOR CONTRIBUTORS

The Condor publishes research reports and short articles that contain new information relevant to the biology of wild species of birds. The journal also publishes occasional review articles. Submit manuscripts for publication

to the Editor, The Condor, Meriden Road, Lebanon, New Hampshire 03766.

Manuscripts. Submit the original plus two copies of the text, tables, and illustrations for the use of reviewers. Type the text, tables, legends and literature-cited section double-spaced on one side of standard (8½ × 11 inch), good quality bond paper, with at least one-inch margins. Do not use erasable, light weight, or mimeo bond. Put the author's name in the upper right-hand corner of every page. Number pages through the list of references; include tables and legends for figures on separate unnumbered pages. Avoid footnotes. Provide a concise, definitive title, and where necessary, subheadings within the text (no more than three levels). Give a factual summary for longer papers. Tables (unruled) should be kept at a minimum and should not duplicate material in either the text or graphs. Mathematical formulas should be written on one line, where possible.

Scientific names should always be given at first mention of a species. Scientific and English names for birds should follow the usage of the A.O.U. Check-list of North American Birds (Fifth ed., 1957; 32nd Suppl., Auk 90:411; 33rd Suppl., Auk 93:875) or an appropriate equivalent. When both the English and the scientific names

are given as a paragraph heading (e.g., in regional lists of species), put the scientific name first.

Metric units are strongly favored in all measurements. Abbreviations of statistical terms and mensural units should conform with the Council of Biology Editors' (CBE) Style Manual (Fourth ed., 1978. American Institute of Biological Sciences, 1401 Wilson Blvd., Arlington VA 22209) except for temperatures, where the degree sign is to be retained. Designate clock time in the 24-hour system and write it as 08:00 or 17:25 (not 0800 hours, or 1725 hours). Use the military system of calendar notation (e.g., 1 January 1976). In many other matters of form the CBE style manual will be helpful.

Illustrations. All illustrative material should be arranged in the form of figures, each with an arabic number. Nearly all illustrations should be on 8½ × 11 inch paper, including labels of coordinates. The general rule is to make drawings about twice the size they will appear in print. That is, one-column illustrations (2¾ inches) should be 5–6 inches wide, and two-column (5¾ inches) figures should be no more than 11 inches wide. Try to plan graphs for a single column. Send either original artwork or excellent photographs of it, in no case larger

than 8½ × 11 inches. Copies by duplicating machines are acceptable only for reviewers.

Use mechanical lettering, pressure transfer letters, or good hand lettering. Typewriter lettering is not acceptable. Avoid bold, heavy and ornate letters. When reduced for printing, lettering should be little, if any, higher or grossly darker than the smallest text type; nor should the lettering be much smaller than the smallest text type in the journal. The size of the lettering is simple to plan with 50% reduction of the illustration.

Coordinate paper (light blue grids only), and any smooth-finish drafting paper are suitable. Tracing paper and cloth are not recommended; if submitted they should be mounted on white cardboard. Use only carbon drafting

or india ink.

Photographs should be glossy prints, no larger than 8½ × 11 inches, and of good contrast and sharpness. Write the author's name and figure number lightly on the back in soft pencil. Never use paper clips on photographs. Do not fold photographs, or mark the surface of the print to indicate cropping. If a given figure contains separate portions, these should be composed by the author and identified by letters. Composite photographs should be mounted touching one another and be squared on all sides. Letters and arrows are best applied by pressure-sensitive materials. If illustrations are faulty, costs of alterations may be passed on to the author.

Carefully examine proofs of illustrations to be sure that numbers or symbols have not been accidentally lost

during engraving.

For advice on preparing illustrations, see Steps Toward Better Scientific Illustrations by Arly Allen (1977.

Allen Press, Inc., Lawrence, KS 66044).

References. Check the accuracy of literature citations against original sources. Articles containing more than five citations should list them at the end. If there are not more than five references, cite them in the text, following these examples: Crowell (Auk 85:265, 1968), or (Crowell, Auk 85:265, 1968). In-text citations of publications by three or more authors should be in the form "Jones et al." Citations of two or more works on the same topic should be listed in chronological order (e.g., Moreau 1944, Lack 1947). For abbreviations and forms of titles of serial publications, follow the BIOSIS List of Serials (1974, BioSciences Information Service of Biological Abstracts). Consult recent issues of *The Condor* for additional details.

Address. Give your present address at the end of the article. If you are no longer at the institution where you

did the work, and you wish to credit that institution, you may mention it first.

Publication. Papers in The Condor are ordinarily published in order of receipt of the original manuscript in

the editorial office. (This is not the same as the date of acceptance, given at the end of every article.)

**Proof.** Proofs and reprint order forms will ordinarily be sent to the senior author. Please inform the Editor well in advance of any change in address or mechanism for handling proofs. Since changes in proof are expensive, authors should not make major revisions at this stage and will be charged \$1.00 per revision line. Proofs should be checked carefully against typescript, and both returned promptly to the Editor.

# PRICE LIST OF PUBLICATIONS ISSUED BY THE COOPER ORNITHOLOGICAL SOCIETY

#### 1 August 1978

Many publications are now in low supply, and those not listed below are sold out. Some individual issues from out-of-print volumes of The Condor are available, and occasionally a trade can be worked out where we are short of items offered. We will buy certain issues of The Condor; send your list. Also, we can supply photocopies of some missing issues. Inquiries and requests are welcomed.

Vols. 3 to 10 (1899–1908) The Condor, scattered issues available.  Vols. 11 to 30 (1909–1928) The Condor, complete, each volume  Vols. 31 to 50 (1929–1948) The Condor, complete, each volume  Vols. 51 to 60 (1949–1958) The Condor, complete, each volume  Vols. 51 to 60 (1949–1958) The Condor, complete, each volume  Vols. 51 to 60 (1949–1958) The Condor, complete, each volume  Vols. 61 to 69 (1958–1967) The Condor, complete, each volume  SEparate issues of the above are priced at \$2.00 each.  Vols. 70 to present, The Condor, complete, each volume  Vols. 70 to present are quarterly. Separate issues are \$4.00 each.
