BIOGRAPHIES FOR BIRDWATCHERS

The Lives of Those Commemorated in West Palearctic Bird Names

Barbara Mearns
and Richard Mearns

A Volume in the BOOKS ABOUT BIRDS Series

The authors have re-searched the lives of the early ornithologists after which so many birds have been named. Almost all of the 91 people described are illustrated in contemporary portraits and every one of the species named is beautifully drawn. The book will delight and fascinate the reader, both as a comprehensive reference and an account of the remarkable achievements of the early ornithologists and collectors.
