

RECENT PAPERS ON FLYWAY POPULATIONS IN WSG BULLETIN

This section lists papers published in *WSG Bulletin* during the last three years (1984-1986) that have expanded knowledge of the locations of breeding grounds, staging sites and wintering grounds, and the migrations between them, of waders on flyways throughout the world. We have included some progress reports of projects co-ordinated by the Wader Study Group, but only where these provide extensive new information. For simplicity, the address of only the senior author is given.

Back issues of *Wader Study Group Bulletin* are available from the Membership Secretaries, N. and J. Clark, Department of Zoology, University of Edinburgh, West Mains Road, Edinburgh EH9 3JT, U.K., price £3 each, incl. postage and packing.
