

RECENT PUBLICATIONS ON WADERS

The last list appeared in Bulletin 11. It is now a year since the recent publications list was reintroduced as a more regular feature of the Bulletin, and I would like to thank those people who have commented on the contents and pointed out items omitted. Equally, any further opinions on the contents and details of omissions are always welcome. In particular, papers in local reports are easily missed.

Readers may like to note that, for each year, lists of most publications concerning waders and other waterfowl are published in IWRB Bulletin and that abstracts of many papers appear in Ibis, Auk and Bird-Banding.
