

RECENT PUBLICATIONS ON WADERS

Compiled by Theunis Piersma

We try to make these lists as complete as possible and therefore help is very welcome (sending titles, abstracts or reprints)! These should be sent to: Theunis Piersma, Hendrikstraat 21, 9724 NA Groningen, The Netherlands. Thanks to Cor Smit, Frank-Ulrich Schmidt, Meinte Engelmoer and our editors for help. Translated titles of papers in languages other than English are bracketed: round brackets if the English translation is by the author; square brackets if the translation is by others (here the original title is given as well).

- ADAM, G. 1979. Dünnschnabelmöwe (*Larus genei*) und Graubruststrandläufer (*Calidris melanotos*) in der Camargue (Südfrankreich). [Slender-billed Gull and Pectoral Sandpiper in the Camargue.] *Orn Mitt.* 31: 91-92. In German. (Pelikanstr. 17, 7000 Stuttgart 50, W.Germany.)

Studies on the Movement and Population Structure of Indian Avifauna: Annual Report 1, June 1980 - July 1981

by Ali, S. & Hussain, S.A. 1981 (?). 141pp. Bombay Natural History Society, Hornbill House, Shahid Bhegat Singh Road, Bombay 400 023, India. (No price given)

This report summarises the progress made during the first year of a 5-year study, sponsored by the Indian Ministry of Agriculture and the U.S. Fish & Wildlife Service, and funded by the U.S. Foreign Currency programme. The survey involves extensive vegetation surveys and invertebrate sampling programmes, as well as the trapping of very large numbers of birds in terrestrial, freshwater and estuarine habitats. Two main sites are being studied: the Keoladeo Ghana Bird Sanctuary in Bharatpur, in northern India, which is a major waterfowl refuge; and Point Calimere, a forest, marsh, estuary and salt-pan complex in south-east India. I will restrict this summary mainly to the information on waders in the report.
