

RECENT RECOVERIES OF WADERS RINGED IN BRITAIN AND IRELAND

compiled by Nigel and Jaquie Clark

The following lists are compiled from data provided by the British Trust for Ornithology, from whom permission must be sought before using these data in publications. As usual, space does not allow us to detail all records in full. For the more rarely recorded species all records are given. For others, except Oystercatcher, all movements of over 100 km, and recoveries of more than 3000 days after ringing, are detailed.

Symbols. Age is coded according to EURING code. v = caught and released (i.e. controlled), vv = ring number or colour marks (dye or rings) read in the field, + = shot or killed by man, x = found dead or dying, ? = manner of recovery unknown. Co-ordinates are generally given only when the locality is first mentioned.

Oystercatcher *Haematopus ostralegus*

The durations for all recoveries are as follows: <500 days 19, 500-999 days 9, 1000-1999 days 22, 2000-2999 days 22, 3000-3999 days 16, 4000-4999 days 7, 5000-5999 days 7, over 6000 days 4.
