

## RECENT PUBLICATIONS ON WADERS 41

compiled by Theunis Piersma

There has been a steady increase in the number of references listed in 'Recent Publications on Waders', as is shown in Figure 1. This may be one of the reasons why an increasing number of complaints reached me that the lists became too long to be 'digestible'.

Since I do not want to become selective, this issue introduces a new system: a subdivision in four subject-headings, to make the life of serious waderologists easier. The subject-headings are: 1) Breeding, 2) Behaviour, ecology and evolution, 3) Distribution and faunistics and 4) Miscellaneous. Please let me know your comments and suggestions.

Since we try to make these lists as complete and up to date as possible any help is most welcome. Send omissions, mistakes, new titles, abstracts or reprints to Theunis Piersma, Korte Nieuwstraat 4, 9724 LC Groningen, The Netherlands. During the preparation of this issue, help was received from Cor Smit, Ian Bainbridge, F.U. Schmidt, Meinte Engelman, Les Batty, Nick Davidson, Stuart Rae, Han Vlug, Paulo de Tarso Zuquim Antas and Tom van der Have. Translated titles in languages other than English are bracketed: round brackets if the translation is by the author(s); square if not.

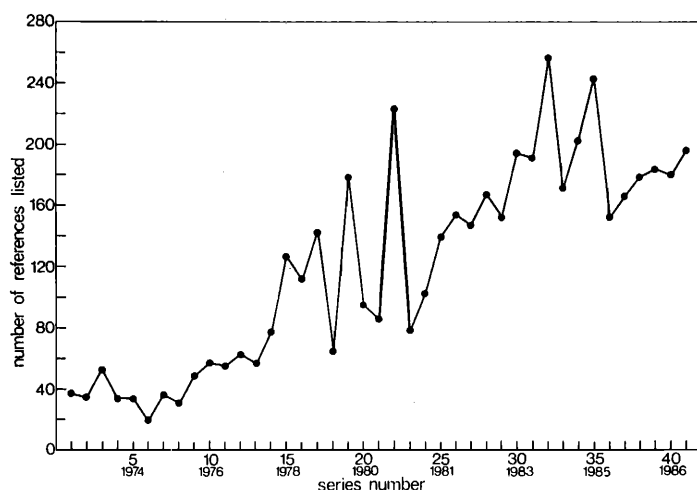

Figure 1. Increase in the number of references listed in "Recent Publications on Waders" since its inception.
