

RECENT RECOVERIES OF RINGED WADERS
compiled by Nigel & Jacque Clark & Phil Ireland

Starting with this issue of the Bulletin it is hoped to make the 'Recent Recoveries of Waders' lists more international than has previously been the case. To do this the assistance of members living in countries other than Britain and Ireland is required. Some people have already been contacted directly to ask them if they are able to provide data but if you think you can help Phil Ireland would like to hear from you. His address is 27 Hainfield Drive, Solihull, West Midlands B91 2PL, UK.

The following lists are compiled from data provided by the British Trust for Ornithology, Rui Rufino (Portugal), Jadwiga Gromadzka (Poland), Terry Oatley (South Africa), Peter Prokosch (Greenland) and Herman Hotker (Germany).

Permission should be sought from the appropriate National Ringing Scheme before using these data in publications.

Symbols. Age is coded according to EURING code. v = caught and released (i.e. controlled), vv = ring number or colour marks (dye or rings) read in the field, + = shot or killed by man, x = found dead or dying, ? = manner of recovery unknown. Co-ordinates are generally given only when the locality is first mentioned.

Data available for compiling list

Germany: Selection of recent recoveries for Bar & Black-tailed Godwit, Curlew and Woodcock only.

Greenland: Three recoveries, all listed below, resulting from 36 waders ringed in NW Greenland in 1987.

British Isles: All recoveries reported since Bulletin 50 which are over 100 km or 6000 days are listed or summarised.

Poland: Complete set of recoveries received by National Ringing Scheme in 1987. All are listed here except for Dunlin where some selection has been made.

Portugal: All recoveries to date of waders ringed in Portugal are listed.

South Africa: Seven recoveries received since July 1985 are all listed in full.
