

RECENT RECOVERIES OF WADERS
compiled by Nigel and Jacquie Clark and Phil Ireland

This is the second issue of the Bulletin in which it has been possible to include recoveries originating in countries other than the British Isles. The compilers of this section are grateful to those listed below who have provided data but the continued 'Internationalization' of the recoveries list depends on a regular supply of data. If you are able to provide data for this section or have a contact who you think would be willing to help please contact Phil Ireland at 27 Hainfield Drive, Solihull, West Midlands, B91 2PL, UK.

The following lists are compiled from data provided by the British Trust for Ornithology, Instituto Nazionale di Biologia Della Selvaggina, Italy (via Nicola Baccetti), Herman Hotker (Germany), and Kim Lowe (Australia and New Zealand).

Permission should be sought from the appropriate National Ringing Scheme before using these data in publications.

Symbols Age is coded according to EURING code, v = caught and released (i.e. controlled), vv = ring number or colour marks (dye or rings) read in the field, + = shot or killed by man, x = found dead or dying, ? = manner of recovery unknown. Co-ordinates are generally given only when the locality is first mentioned.

Data available for compiling list

British Isles: All recoveries reported since Bulletin 51 which are over 100 km or 6000 days are listed.

Germany: Selected recent recoveries for Oystercatcher only.

Italy: Post 1982 recoveries which are over 100 km or 3000 days are listed.

Australia and New Zealand: A selection of recoveries from the most recent issue of 'The Stilt'.

OYSTERCATCHER *Haematopus ostralegus*

Originating in the British Isles
