

Recent recoveries of waders

collated by Phil Holland

Compiled from data provided by the BTO from whom permission should be sought before using in publications.

Recoveries are those over 100 km. or 6000 days (except Oystercatcher 600 km. or 7300 days). Recoveries from other schemes are welcome. Please send them to me at Rennie Court, Lancaster, LA1 5XE, U.K.

Symbols: Age is coded according to EURING code, v = caught and released (i.e. controlled), vv = ring number and colour marks (dye or rings) read in the field, + = shot or killed by man, x = found dead or dying, ? = manner of recovery unknown. Co-ordinates are generally only given when the locality is first mentioned.

OYSTERCATCHER *Haematopus ostralegus*
