

The International Wader Study Group acts as the Wader Specialist Group of Wetlands International and the IUCN Species Survival Commission.

THE INTERNATIONAL WADER STUDY GROUP

The International Wader Study Group (WSG) is an international association of amateurs and professionals from all parts of the world interested in Charadrii (waders or shorebirds). Membership of the WSG is currently over 650 worldwide. Members can be found in over 50 countries around the world, including all the European countries, as well as the Americas, Asia, Africa and Australasia. The interests of the group have diversified from its original focus on ringing and migration-related studies to embrace all aspects of wader biology.

The aims of the International Wader Study Group are:

- to maintain contact between both amateurs and professionals studying waders
- to help organise co-operative studies; and
- to provide a vehicle for the exchange of information on waders and their biology.

The main means of achieving these aims are by:

- holding an annual conference;
- publishing, three times per year, the *Wader Study Group Bulletin*, and on an occasional basis, *International Wader Studies*, each issue of which covers a major topic of wader biology and/or conservation; and
- acting as Wetlands International's Specialist Group on waders.

WADER STUDY GROUP BULLETIN

The *Wader Study Group Bulletin* provides a forum for news, notices, ringing recoveries, recent publications, new study methods and general articles. It also publishes the results of wader research from all parts of the world including preliminary or interim results where appropriate. Each *Bulletin* contains a mix of newsletter items, informal descriptions of research activities, meetings and expeditions, as well as formal presentation of research results and preliminary analyses. The size of the *Bulletin* varies with each issue but usually consists of 60–100 pages.

The *Bulletin* appears in April, August and December. The deadlines for inclusion of announcements are 1 January, 1 May and 1 September respectively. Papers and articles, however, must be received well in advance of these dates to allow time for refereeing.

Papers and articles should be sent to the **Editor, Humphrey Sitters**, Lamosa, Old Ebford Lane, Ebford, Exeter EX3 0QR, UK (e-mail: hsitters@aol.com)

News items, announcements and requests for information should be sent to the **Editor of the Notes & News section, Robin Ward**, The Wildfowl & Wetlands Trust, Slimbridge, Glos. GL2 7BT, UK (e-mail: robin.ward@wwt.org.uk).

Books and other items for review should be sent to the **Review Editor, David Stroud**, Spring Meadows, Taylors Green, Warmington, Peterborough PE1 1JY, UK (e-mail: David.Stroud@jncc.gov.uk).

Intending contributors from the following regions who need advice or assistance (e.g. as to the scope of a paper or obtaining statistical advice or arranging translation into English) are welcome to contact the following Regional Bulletin Co-ordinators whose contact details can be found on the inside of the front cover:

- Russia:** Pavel Tomkovich
- North America:** Robert Gill
- South America:** Patricia González
- Africa:** Les Underhill

Matters relating to the circulation of the *Bulletin* should be sent to the **Membership Secretary, Rodney West**, Flint Cottage, Stone Common, Blaxhall, Woodbridge, Suffolk IP12 2DP, UK (e-mail: rodwest@ndirect.co.uk).

The Editors are always pleased to discuss possible contributions with potential authors, and to advise on presentation. Manuscripts can be typed but should preferably be word-processed and submitted either as e-mail attachments, on 3½" disks or on a CD. If any non-English font (e.g. Polish) is required, a Truetype (.ttf) file for the font must be supplied.

Authors should follow the style of the most recent *Bulletin*. Pay particular attention to the style of headings and reference lists. Line illustrations and figures should be produced neatly in black ink on good-quality white or tracing paper, with linear dimensions about 50% larger than intended publication size. Their final size should relate either to one column width of 85 mm or a double column width of 175 mm or to some measurement within that range of widths. Please send original illustrations and retain a copy in case of loss or damage. Good-quality photographs may also be published. Photographs should be high-contrast glossy prints (preferably black and white or else in colour) and should be submitted at twice their intended published size. Colour slides can also be accepted. It must be understood that such illustrations will be printed as monochrome unless prior arrangements for colour have been made.

The publication of interim results in the *Wader Study Group Bulletin* is not intended to pre-empt publication of final results as journal papers. Readers are requested to bear in mind that results and analyses published in the *Bulletin* may be of a preliminary nature, and to take account of this if making reference to these articles in publications of their own. If editors of other journals wish to reprint items from the *Bulletin* with suitable acknowledgement, this can usually be arranged; the person concerned should contact the Editor.

To celebrate its 25th anniversary, WSG re-launched the occasionally published Special Issues of the *Bulletin* as a new journal series: *International Wader Studies*. Recently published volumes include: Shorebird Research in the Western Hemisphere; Conservation and management of shorebirds in the Western Great Basin of North America; and Wader Research and Conservation in Europe and North Asia (the Proceedings of the Odessa Conference); whilst forthcoming issues include: Wader study methods (two volumes), and a review of the status of European Avocets *Recurvirostra avosetta*.

Membership of the International Wader Study Group is open to all those with an interest in waders (shorebirds).

Membership costs £17 (or €27 or US\$27) a year in high-income countries and half this amount in low-income countries (see Editorial of this issue). The subscription can be paid in most international currencies; contact the Membership Secretary for details.

Members receive the *Wader Study Group Bulletin* three times a year; and, without additional cost, copies of the occasional series *International Wader Studies*.

To join the International Wader Study Group contact: the Membership Secretary, Wader Study Group, c/o National Centre for Ornithology, The Nunnery, Thetford, Norfolk IP24 2PU, UK.

Wader Study Group Bulletin

Volume 99, December 2002

Editorial	1
Annual Conference of the International Wader Study Group, Jurata, Hel Peninsula, Poland, 4–7 October 2002	2
Minutes of the 2002 International WSG Annual General Meeting	4
Annual Conference – Abstracts of talks	6
Annual Conference – Poster abstracts	12
Workshop on the project “Tringa glareola 2000” – Abstracts of talks	19
Notes & News	21
The day we caught six Painted Snipe C. Hassell	25
New website: Models to predict the effect of human activities on the coast on passage and wintering shorebirds: www.dorset.ceh.ac.uk/shorebirds/	26
Abstracts of wader theses: P. Battley, S.E.A. Le V. dit Durell, M. Eaton, J. Smart, Y. Zharikov	27
Waders and other wetland birds on Byet Dwarka Island, Gulf of Kutch, western India A.J. Urfi	31
Importance of the Rio Gallegos estuary, Santa Cruz, Argentina, for migratory shorebirds S. Ferrari, C. Albrieu & P. Gandini	35
Shorebird counts in Panama during 2002 emphasize the need to monitor and protect the Upper Panama Bay D.M. Buehler	41
Productivity of African Black Oystercatchers <i>Haematopus moquini</i> on Robben Island, South Africa, in the 2001–2002 breeding season K.M. Calf & L.G. Underhill	45
Fading of colour-bands used on Pied Oystercatchers <i>Haematopus longirostris</i> and Sooty Oystercatchers <i>H. fuliginosus</i> in southeast Australia P. Collins, R. Jessop & C. Minton	50
Use of individual colour-ringing to estimate annual survival in male and female Red Knot <i>Calidris canutus islandica</i>: a progress report for 1998–2001 C. Brochard, B. Spaans, J. Prop & T. Piersma	54
Atypical aggregation of breeding Common Snipe <i>Gallinago gallinago</i> A. Levesque, B. Trolliet & F. Ibañez	57
The use of tape-recorded distress calls to increase shorebird capture rates B. Haase	58
An objective method of quantifying the avian interest of an area by means of a weighted population index G.E. Austin, A.J. Musgrave, M.M. Rehfisch & M.J.S. Armitage	60
