DUKE AND REDIG RECEIVE PRESTIGIOUS AWARD

Dr. Gary E. Duke and Dr. Patrick Redig, both of the College of Veterinary Medicine, University of Minnesota, received a joint American Motors Conservation Award on November 23, 1976. Presentation was made at the Fall Awards Convocation of the Veterinary College. The citation states in part:

"Duke and Redig are among seventeen men and five women from seventeen states named to receive 1976 Conservation Awards. They have been presented annually since 1954 to professional and nonprofessional conservationists for outstanding contributions in the field of renewable natural resources. Winners receive bronze sculptured medallions and honorariums of \$500.

"Dr. Duke, a professor of physiology, and Dr. Redig, a veterinarian, are making a major contribution to understanding and preservation of birds of prey and other large nongame birds through establishment of a unique rehabilitation clinic at the University of Minnesota. They have combined their skills in physiology, surgery, and pharmacology in the treatment of hundreds of sick or injured birds, ranging from eagles to falcons to many other kinds of raptors."

Dr. Duke, of course, is the hard-working Treasurer of the Raptor Research Foundation, and Dr. Redig is an enthusiastic and productive member. Congratulations, Gary and Pat!
