PRINTS

THE COVER of American Birds for May, 1978, was taken from a brilliant painting by Diane Pierce, showing five winter-plumaged American Goldfinches in lively animation in a snow-draped sweet gum. The cover did not do justice to the bright colors of the painting. American Birds is considering issuing a high quality print of this painting, on fine paper, in a very limited edition, each numbered and signed by the artist. Possible price, about \$25. If you are interested, write AMERICAN BIRDS.

Nothing looks at life like Leitz.

How can you get this close to wildlife without missing a single detail?

With Leitz optical excellence, of course.

Leitz Trinovids® have the finest optical systems of any binocular in the world.

Trim, flat and nicely compact, Trinovids more than equal the performance of the larger, bulkier binoculars.

Viewing angle is most like human vision, so it doesn't seem like you're

peering through binoculars. You get bright, needle-shape images right to the extremes of the entire field, even while wearing eyeglasses. Or even in twilight.

So if you want a closer look at life, try looking into a pair of Trinovid binoculars by Leitz.
