**WANT SATISFACTION?**

Jim Meritt, one of New Jersey's leading birders, took a BIRD BONANZAS tour last summer. After the tour Jim wrote, "Overall, it was far and away the best birding trip I have ever taken, and I'm so glad I went." The trip cost Jim several hundred dollars less than tours with almost identical itineraries offered by other leading agencies. If you are interested in a birding tour, we think we can offer you the same satisfaction.

## Index of S.A.s

The letters S.A. above a boxed note in the text of a Regional Report stand for the words Special Attention. Where boldfaced species are mentioned in these "essays" they are also listed in the boldface species index.

Albatross, Laysan: appearance at numerous unprecedented Hawaiian localities. (3)352.  
 Alcids: ideal conditions off n. Newfoundland bring record flights of Thick-billed Murres and Dovekies. (2)147.  
 Anhinga, American: large numbers reported along North Carolina Coastal Plain. (3)285  
 Ardeids: sightings of Western Reef-Herons and Little Egrets in the West Indies add to an already confusing picture. (2)214.  
 Coot, "white-shielded": Illinois scores region's first record. (3)307.  
 Crane, Whooping: all but one of fourteen young hatched by Sandhill Crane foster parents survive at Grays Lake N.W.R., Idaho. (1)80  
 Crossbill, sp.: invasion of Red and White-winged species in Vermont and New York spurs debate on breeding status and range (2)165.  
 Curlew, Little: hundreds of birders witness first North American record in California. (1)102  
 Duck, Muscovy: a call for careful observation of wild-acting Muscovies seen in s. Texas (2)186.  
 Duck, Muscovy: two adults seen for two months on the Rio Grande. (3)323.

Falcon, Peregrine sharp increase in s Ontario yields cautious optimism. (1)48.

Falcon sp.: Hawaiian birders spot vagrant kestrel sp. and Peregrine. (2)213.

Gnatcatcher, Blue-gray: unusual explosion of numbers N.E. Maritime Region. (1)28.

Geese, sp.: White-fronted, Snow, and Ross' displaced east of normal migration routes. (3)306.

Goldeneye, Barrow's: drake absent from Shark R., New Jersey for the first time since 1970. (2)151.

Goose, Barnacle: appearance in California and Oregon, and deliberations upon the controversy surrounding the species. (3)345.

Goose, Bean: Siberian vagrant at DeSoto N.W.R., Iowa-Nebraska, provides first non-Alaskan record for North America. (2)172.

Ground-Dove, Ruddy: status and origin of birds in Arizona and Sonora debated. (1)87.

Ground-Dove, Ruddy: s. California occurrence may not have been escapee. (1)103.

Gull, sp.: survey at Great Salt Lake, Utah reports more than seven forms including Mew and Glaucous-winged. (2)193.

Gull, Thayer's: this species may prove vulnerable to the closing or moving of coastal dumps in California. (2)206.

Gulls, "white-winged": caution advised in identification. (3)303.

Hawk, Swainson's: largest U.S. flight ever recorded in s. Texas; over 50,000 seen in three days. (1)76.

Hawk, Zone-tailed: bird captured in Louisiana dies of unknown causes. (2)176.

Hérons: large numbers sighted making nocturnal migration off New Jersey coast. (1)32.

Jackdaw: the saga continues; two seen at Nantucket, Mass., four found at Cape Miquelon. (1)28.

Jackdaw: some 52 of these birds seen in Quebec were subsequently destroyed by Que. Fish & Game Dept. (2)149.

Jackdaw: additional details on nesting of pair in Federal Penitentiary in Lewisburg, Pennsylvania. (5)913.

Jay, Blue: s. Texas records its largest invasion ever. (1)77.

Jay, Purplish-backed: individual at w. Texas feeder almost certainly an escapee. (2)184.

Kites, Snail: nesting disrupted by severe drought conditions. (5)903.

Owl, Barred: newly-found individual in California spurs concern about possible impact on Spotted Owls. (3)346.

Owl, Great Gray: numbers down in boreal forest of Prairie Provinces. (2)179.

Owl, Great Horned and Snowshoe Hare: 10-year cycle apparently "bottomed out." (5)928.

Pelagic sp.: Midwestern birders get rare taste of pelagic birding during unusual flight off Michigan. (1)55.

Rail, sp.: heavy predation on rails by herons and egrets found in California, causing concern for vulnerable Black Rail populations. (2)206.

Redhead X Canvasback: male of the Redhead type spotted in Quebec. (1)30.

Reef-Heron, Western: new reports suggest 1970s arrival to West Indies. (5)966.

Scoter, Surf: high levels of toxic selenium detected in Surf Scoters off n. California called alarming. (2)205.

Scoters: large numbers inundate Mountain West Region. (1)83.

Screech-Owl, Western: eastern extension of

range in Texas and Kansas (3)321

Shorebird sp.: vagrant Eurasian Curlew and Common Greenshank return to N.E. Maritime Region. (1)27.

Shrike, Brown: Siberian vagrant banded off California coast for 4th North American record and first non-Alaskan record. (1)99.

Shrike, Loggerhead: continued decline away from Georgia Coastal Plain. (5)901.
